

# **Viindoo Enterprise Management Software**

By **Viindoo Technology JSC**  
<https://viindoo.com/>

# What does a company's strategy consist of?

---

1. How to grow the business
2. How to satisfy customers
3. How to compete rivals
4. How to respond to changing in market conditions
5. How to manage each functional piece of the business and develop needed organizational capabilities
6. How to achieve strategic and financial objectives

# Introduction

---

- **Business Organizations are complex “Systems”** where the interaction between the various functions such as Sales, Distribution, Manufacturing, Materials, Finance, Human Resources, Procurement, etc have to be managed towards a common purpose of delivering the customers maximum value and the optimum price
  - However, since **most of these organizations have a “Functional Structure”**, each function/department works towards their own goals and objectives, rather than the organizational goals.
  - These are **the issues addressed by “Enterprise Resource Planning” software solutions** providing a common, consistent system to capture data organization wide, with minimum redundancy
- 

# What is ERP?

## ERP = Enterprise Resources Planning

→ *ERP integrates the information across functions, and provides a set of tools for planning and monitoring the various functions and processes and ensuring progress towards a common purpose:*

Digitizing all business information.

Building close, cohesive relationships between departments and divisions.

Assist administrators in grasping all information

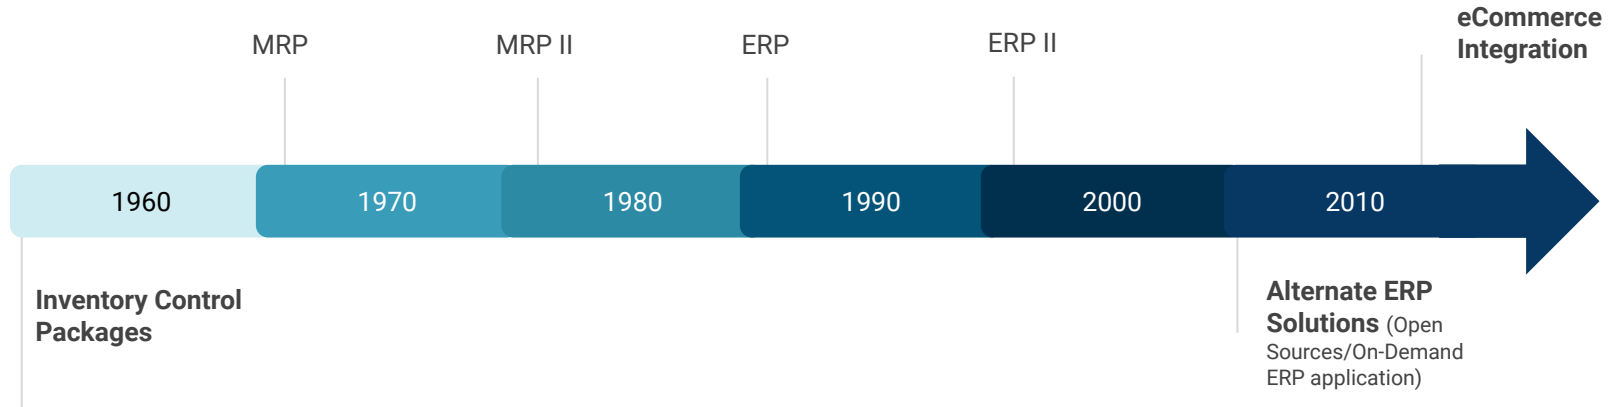

Comprehensive, accurate, complete, and timely business information.

Standardizing business processes and improving the operations of all departments.

Knowing what, where, and when needed at all times, enabling immediate decision-making.

# Evolution of ERP Systems

# What Viindoo offer to you?

## Viindoo is not just an ERP

It is a single solution to manage and grow you business

- ◆ **ERP** (incl. Sales, Purchase, Inventory, Accounting, Manufacturing, Human Resource Management)
- ◆ **CRM** (Customer Relationship Management)
- ◆ **SCM** (Supply Chain Management)
- ◆ **Marketing**
- ◆ **Website Builder & E-Commerce**
- ◆ **IoT**
- ◆ **... AI & Machine Learning** (is developing)
- ◆ Supports more than 88 languages & localizations...
- ◆ **Modular** architecture
- ◆ **Viindoo**  
Deployed on the cloud to bring more value to organizations and cut down investment cost and maintenance cost. More secure and stable.

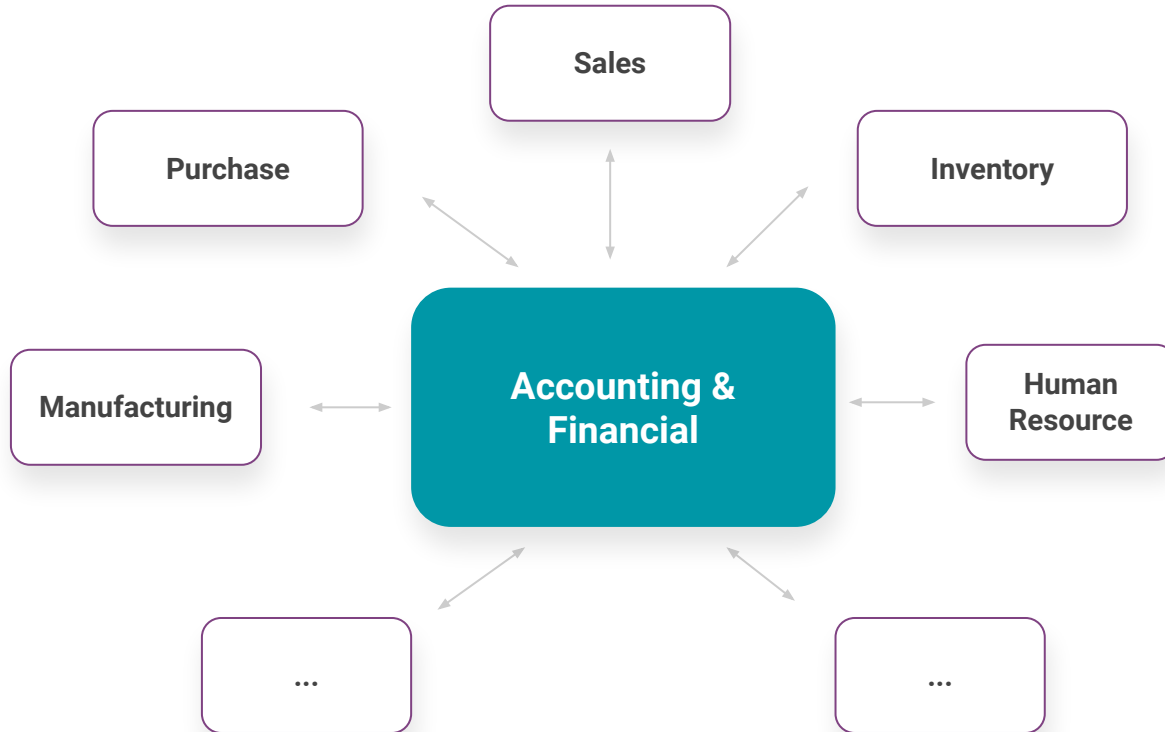

# **Why Viindoo is the Best Choice?**

Let's compare Viindoo with  
traditional ERP solutions

# Current ERP systems

All are accounting centric model

**That was the approach in the  
early 2000s...**

# Modern companies face new challenges

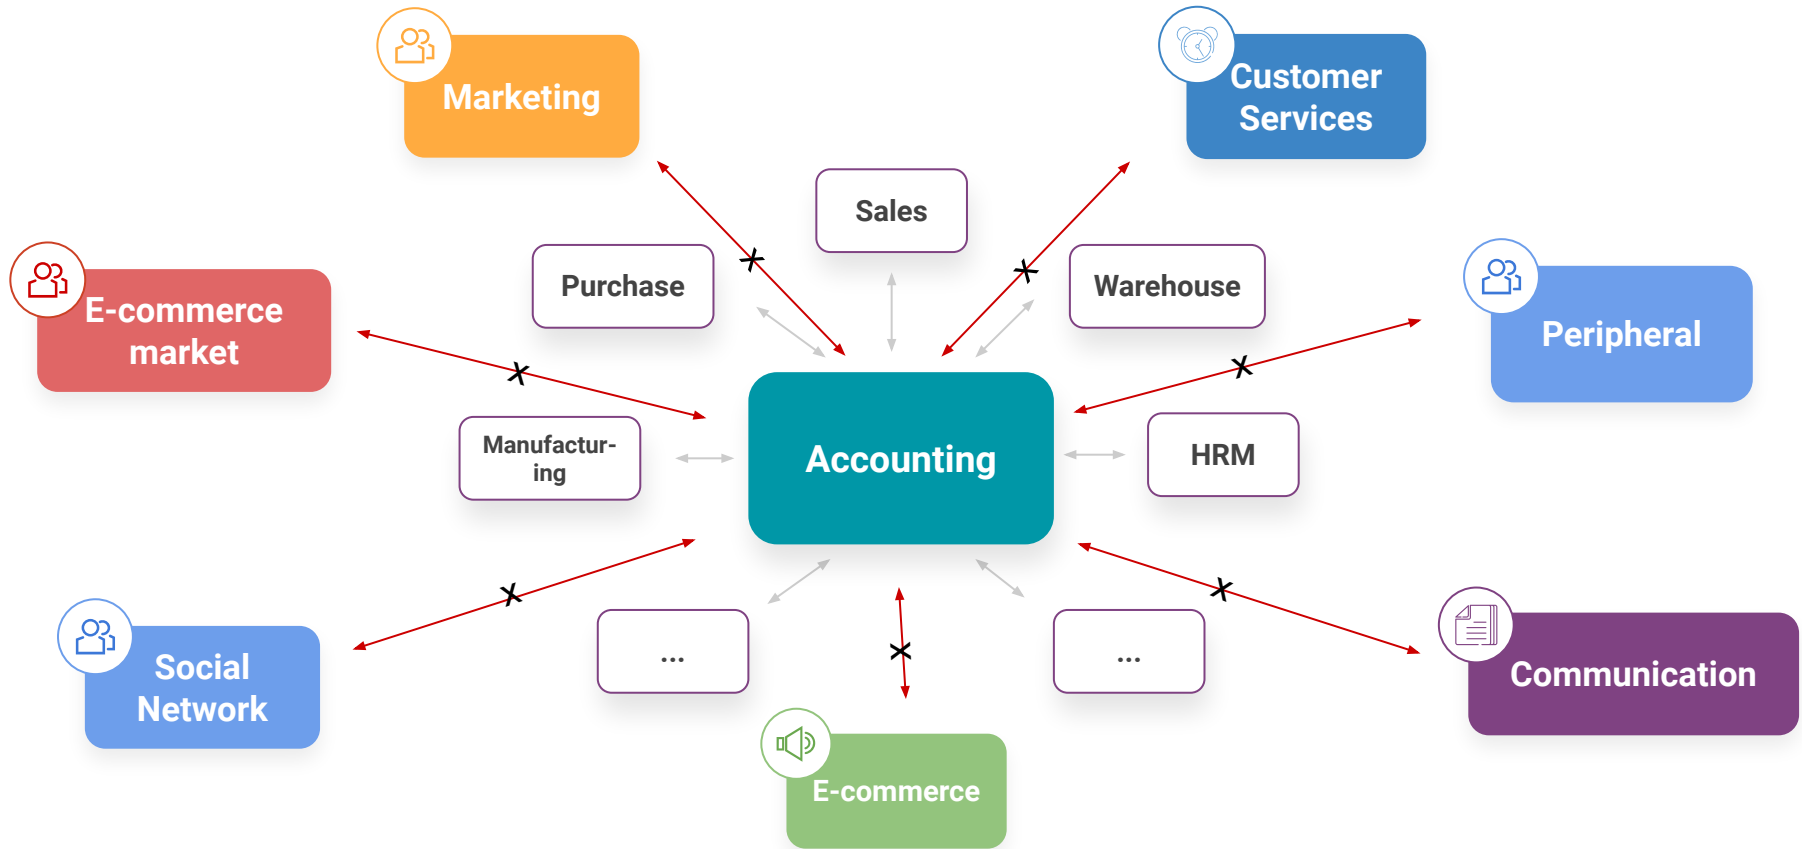

## **ERP nowadays does not meet...**

### **Current ERP systems**

- ❖ Only provides core applications for businesses (accounting, purchasing, sales, inventory, etc.)
- ❖ Cannot be integrated to address new challenges...

# The current ERP cannot solves

Modern Companies are not “accounting centric”

Good companies are “customer centric”!

Modern companies need BI.

Modern companies need mobile apps.

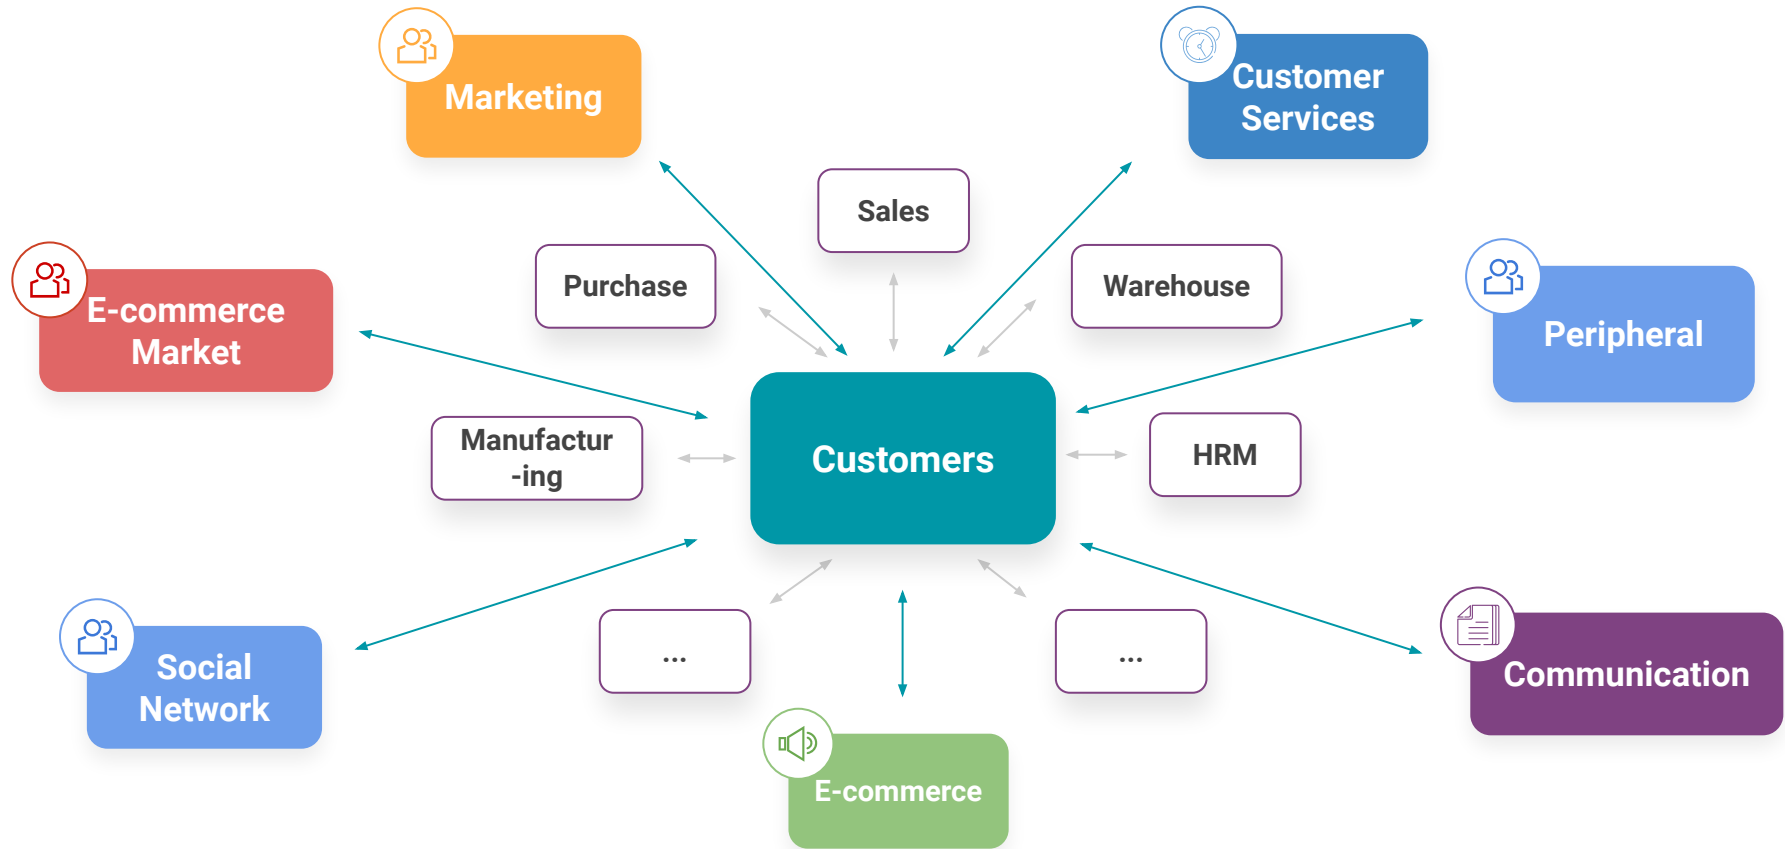

# Challenges that Businesses face

- ❖ Customers become **challenges** to modern companies, not just in accounting.
- ❖ They use plenty of **non-integrated apps** for customer-related functions such as POS, mass mailing, lead tracking, eCommerce, sales consolidation, after-sales services, and communication tools.
- ❖ However, due to the lack of integration, businesses still **cannot solve customer-related problems** thoroughly and effectively.

For Other Employees

# Bring productivity to every employee

- ✓ Flexible deployment options

**SaaS** (Software as a Service)  
with Viindoo  
<https://viindoo.com>

**On-Premise**

Deploy on your own servers and networks

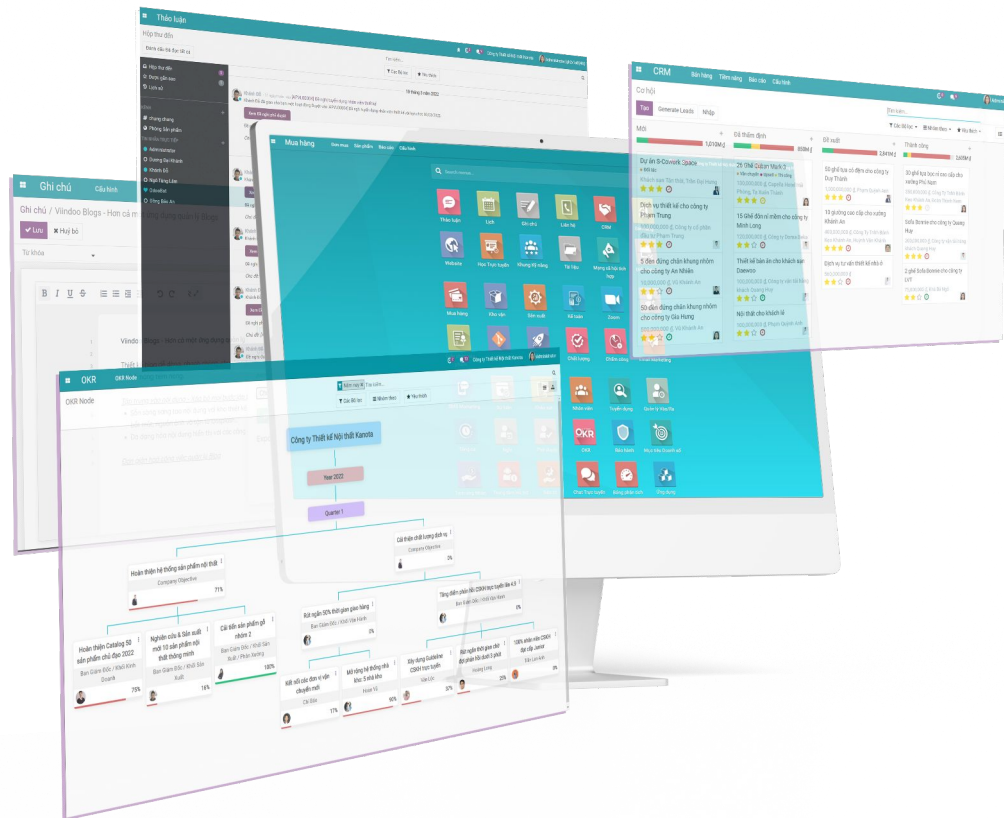

- ✓ Low configuration required comparing to others ERP

- ✓ Super flexible

- ✓ Friendly user interface & Easy to use

- ✓ Cover all the best business practices

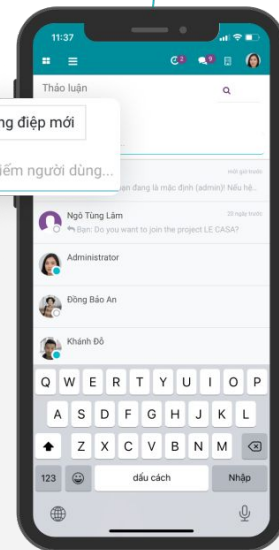

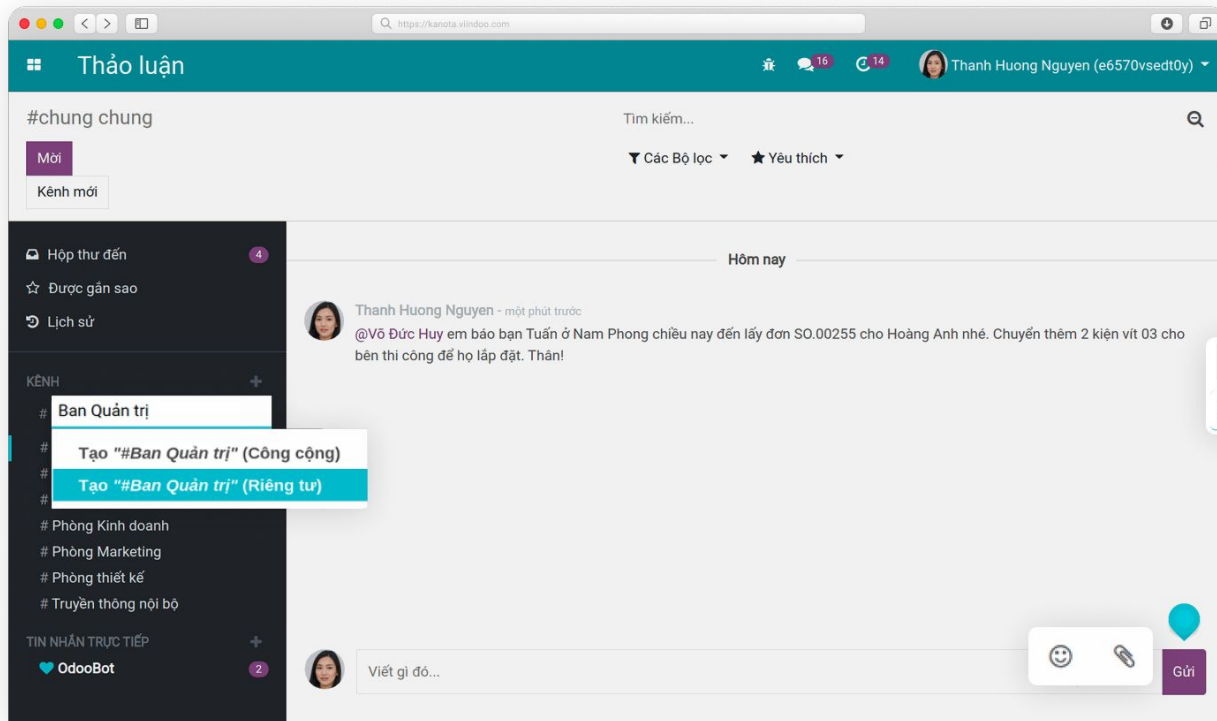

- ✓ Easier to extend with lower customization cost

# More than 4,000 Module feature

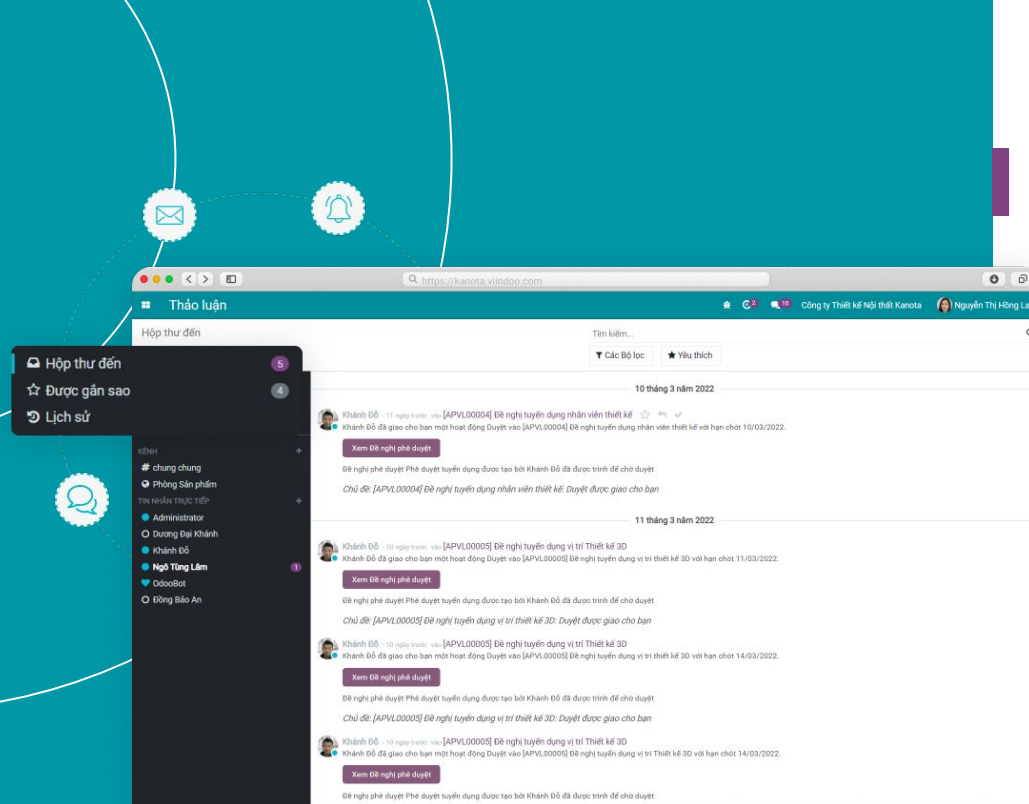

Let's review some standard modules

# Integrated contact information

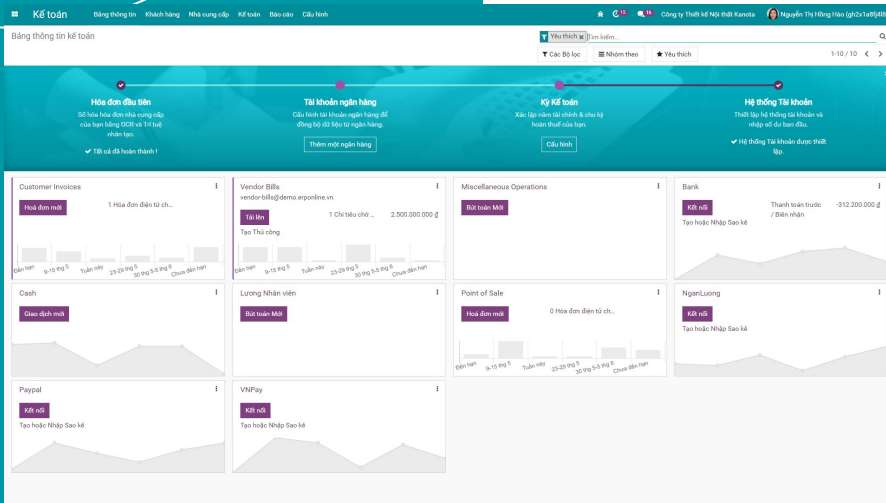

# Integrated contact information

- ❖ **Send email right from professional documents**  
(Example: Sale, invoice, production command, etc.)
- ❖ **Receive email from partners**  
(Customers, suppliers) in the same source document
- ❖ **Strengthen collaboration**  
with colleagues
- ❖ **Minimize** information detection time

# Accounting & Financial

Accounting with Viindoo becomes easier

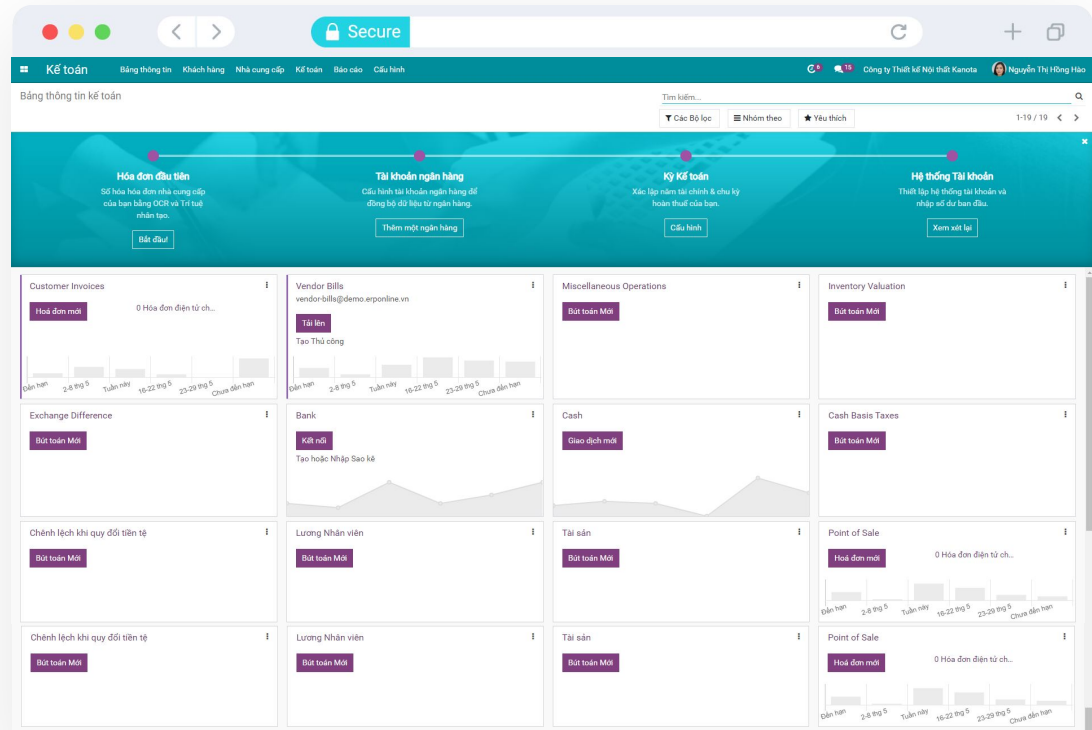

- ❖ User Interface: Friendly, neat layout, scientific, and user-friendly.
- ❖ Full features are designed to meet the needs of businesses of all sizes.
- ❖ Provide a method for the accounting department to collaborate more efficiently and effectively with customers and suppliers.

# Accounting & Financial

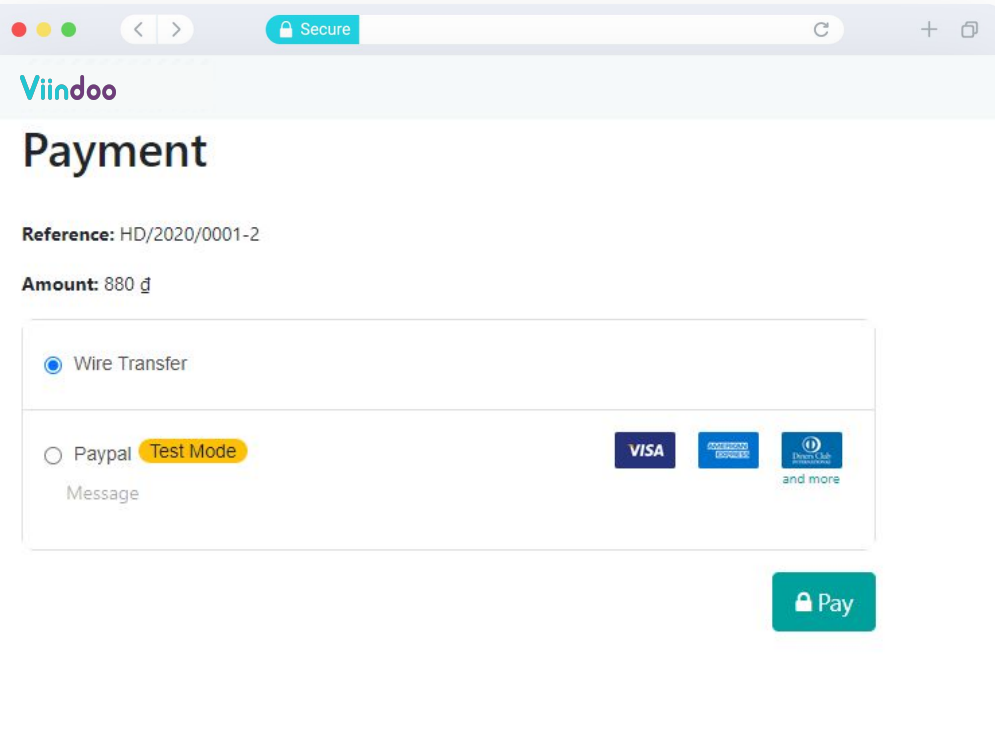

## Smart User Interface

- ❖ Record transactions in a few clicks
- ❖ Easily manage all financial activities in one place.

# Accounting & Financial

Get Paid Faster

The screenshot shows a web browser window with the Viindoo logo and a 'Payment' heading. The browser's address bar indicates a secure connection. Below the heading, the reference number 'HD/2020/0001-2' and the amount '880 đ' are displayed. Two payment methods are available: 'Wire Transfer' (selected) and 'Paypal' (labeled 'Test Mode'). To the right of the 'Paypal' option are logos for VISA, American Express, and Discover, with the text 'and more'. A green 'Pay' button with a lock icon is positioned at the bottom right of the payment form.

# Accounting & Financial

Administration accounting support

- ❖ Can be used by organizations of all sizes.
- ❖ Manage your assets, track expenses, control budgets, monitor payables and receivables, and process employee salary payments.
- ❖ Supports multiple currencies, multiple users with varying access rights, multiple companies with real-time consolidation, and unlimited analytical plans.

[illegible]

- ❖ A revolutionary double entry inventory system
- ❖ Decrease your process times, automate transactions
- ❖ Reduce your stock levels
- ❖ Get complete traceability on all stock operations

# Warehouse Management

Double Entry Inventory Management

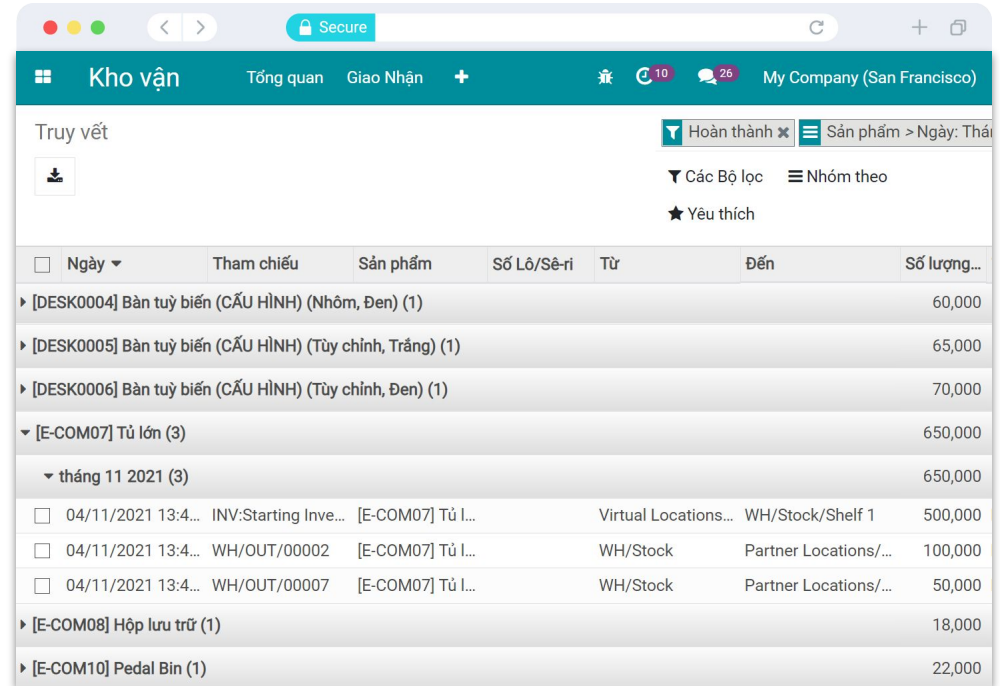

- ❖ Principle: "Nothing is lost, but everything is only moved"
- ❖ Fully traceability from customers to suppliers
- ❖ Advanced Report (e.g., inventory value, real-time inventory levels, inventory value linked to production consumption, etc.)
- ❖ Simple, easy-to-use interface with a scientific information layout

# Warehouse Management

Decrease your process time

- ❖ All data and activities are managed by the software.
- ❖ You can establish logistics rules such as PUSH rules, PULL rules, make-to-order rules, minimum inventory rules, etc.
- ❖ Optimize the planning of supplies through self-proposal (procurement, production, transfer, etc.).

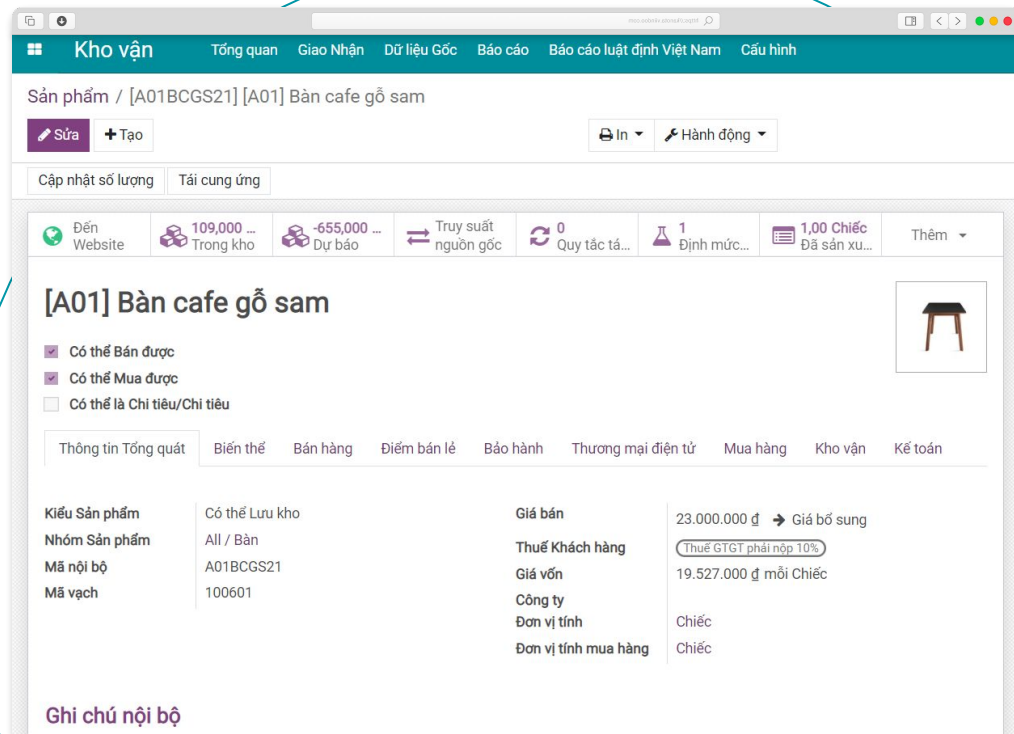

The screenshot displays a web-based Warehouse Management system interface. The top navigation bar includes a logo, the title 'Kho vận', and several menu items: 'Tổng quan', 'Giao Nhận', and a plus sign. On the right, there are user profile icons and the text 'My Company (San Francisco)'. Below the navigation bar, there's a search bar labeled 'Truy vết' and a download icon. To the right of the search bar, there are filters for 'Hoàn thành', 'Sản phẩm > Ngày: Tháng', 'Các Bộ lọc', 'Nhóm theo', and 'Yêu thích'. The main content area is a table with columns: 'Ngày', 'Tham chiếu', 'Sản phẩm', 'Số Lô/Sê-ri', 'Từ', 'Đến', and 'Số lượng...'. The table lists various inventory items, including 'Bàn tùy biến (CẤU HÌNH) (Nhôm, Đen) (1)' with a quantity of 60,000, 'Bàn tùy biến (CẤU HÌNH) (Tùy chỉnh, Trắng) (1)' with 65,000, 'Bàn tùy biến (CẤU HÌNH) (Tùy chỉnh, Đen) (1)' with 70,000, 'Tủ lớn (3)' with 650,000, and 'Tủ nhỏ (3)' with 650,000. There are also rows for '04/11/2021 13:4... INV:Starting Inve...' with 500,000, '04/11/2021 13:4... WH/OUT/00002' with 100,000, and '04/11/2021 13:4... WH/OUT/00007' with 50,000. The table ends with 'Hộp lưu trữ (1)' with 18,000 and 'Pedal Bin (1)' with 22,000.

# Warehouse Management

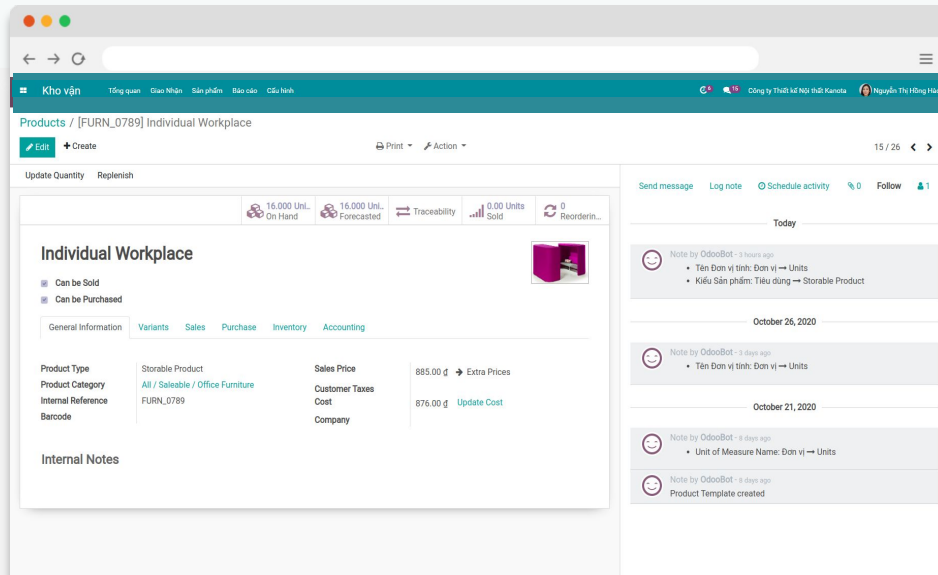

## Automatic Transactions

- ❖ Schedule your picking, packing, receptions and internal moves automatically with Odoo using your own routing rules.
- ❖ Define push and pull rules to organize a warehouse or to manage product moves between several warehouses.

# Warehouse Management

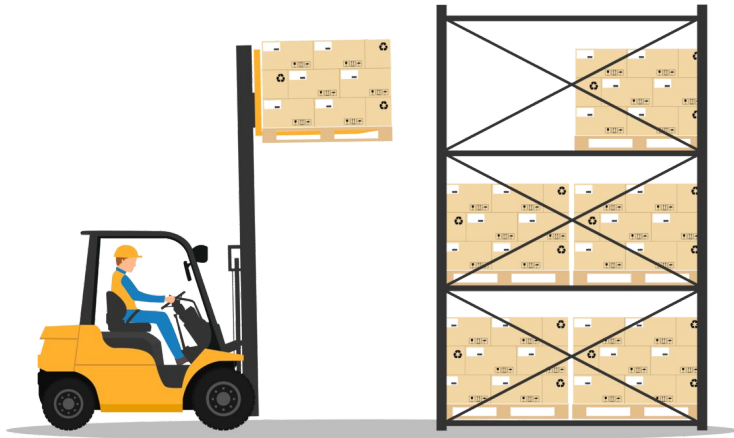

Get Full Traceability

- ❖ Keep an eye on all your stock by tracing all your past and future inventory transactions.
- ❖ Track in detail all stock moves, not only in your warehouse but wherever else it's taken as well (customers, suppliers or manufacturing locations).
- ❖ Browse through the upstream or downstream traceability flows to get a clear view of what happened to a specific product or shipment.

# Warehouse Management

## Reduce Your Stock Level

- ❖ Fine-tune procurement methods according to your needs
- ❖ Reduce your stock while always staying replenished!
- ❖ You can set-up minimum stock rules to have automatic procurements, with the right quantities computed to get to the optimum level specified.
- ❖ Get rid of stress and let the system help you with fulfillment propositions.

# Warehouse Management

Fully Integrated with Operations

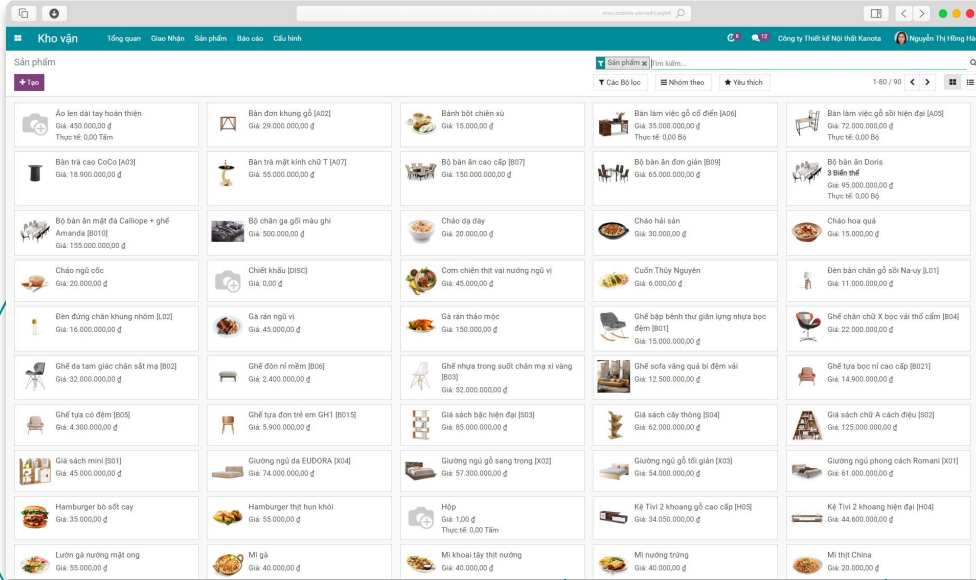

1. Shopping/supply more accurately
2. Integrating closely with buying and selling:
  - Automatically propose internal import, export, and movement
  - Automatically forecast the inventory levels in the future
3. Integrated with accounting:
  - Develop real-time accounting pens to enhance data accuracy and reduce the workload for accounting departments and warehouses.
  - Provide inventory value analysis and report on expenses related to real-time warehouse operations

# Warehouse Management

## Track Serial Numbers

- ❖ Assign serial numbers at every step of your reception or delivery flow.
- ❖ Viindoo allows managing shipments of the same product, barrels, or packages by assigning serial numbers. This serial number helps users accurately trace the origin of goods in and out.

# Warehouse Management

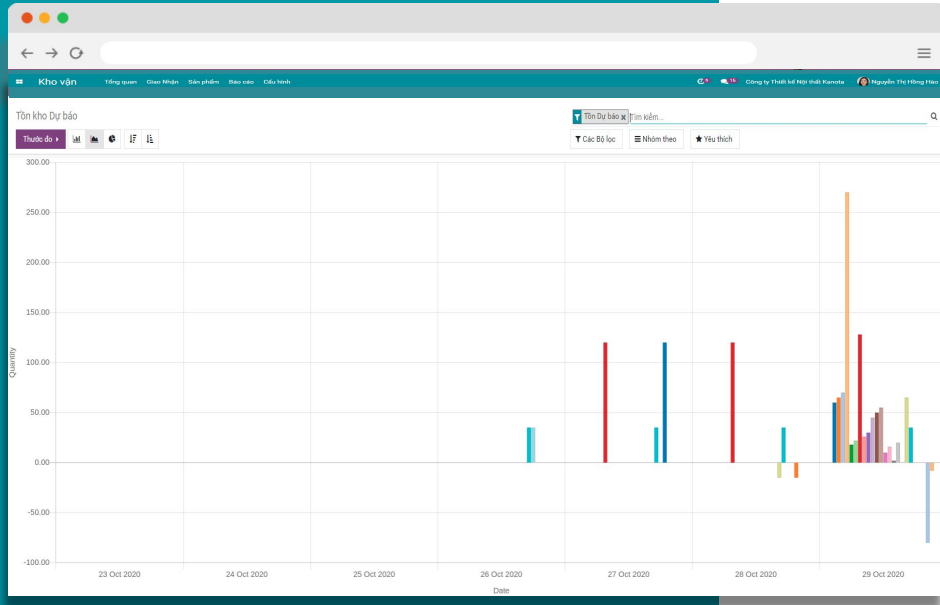

Scale Your WMS easily

- ❖ By managing internal location concepts, customer locations, etc., Viindoo enables businesses to easily adjust the structure and scale of the warehouse system based on the genealogy structure.
- ❖ The management method enables you to scale businesses from micro to very large without any obstacles.

# Warehouse Management

Reporting and Dashboards

- ❖ Get the insights you need to make smarter decisions.
- ❖ Design custom dashboards to find out your warehouse efficiency at a glance.
- ❖ Dig deeper with real-time reports that anyone can create and share.

# Purchase & Supply Chain Management

- ❖ Manage purchase orders
- ❖ Automatically calculate and suggest shopping items when needed
- ❖ Automatically generate pricing greeting requests
- ❖ Supplier Information Management
- ❖ Manage the receipt of goods
- ❖ Control of Supplier Invoices
- ❖ And there are many other features to help you improve your work and save time.

The screenshot displays a web application interface for managing purchase orders. The top navigation bar includes a menu with 'Mua hàng' (Purchase) and other options. The main content area is titled 'Requests for Quotation / P00007'. It features a form for creating a new RFQ, with fields for Vendor (Ready Mat), Vendor Reference, Currency (VND), Order Date (10/30/2020 11:46:16), and Company (My Company (San Francisco)). Below the form is a table of products, including 'Office Chair Black' and 'Office Lamp', with columns for Product, Description, Quantity, Unit Price, Taxes, and Subtotal. The total amount is displayed as 638 đ. The interface also includes a sidebar with a 'Send message' button and a 'Log note' button.

# Purchase & Supply Chain Management

Control Products and Invoices

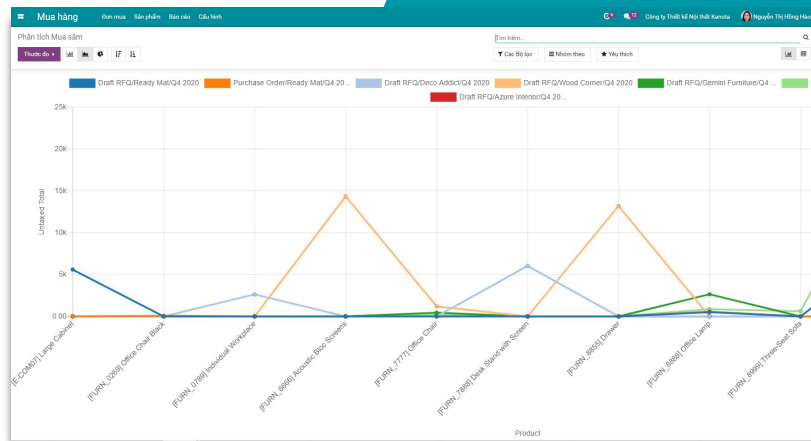

- ❖ No product or order is left out; inventory control allows you to manage backorders, refunds, product receipts and quality control.
- ❖ Choose the right method according to your needs:
  - Pre-generate draft invoices based on purchase orders and products receipts;
  - Create invoices manually and import lines from purchase orders, etc.

# Purchase & Supply Chain Management

Get Statistics On Your Purchases

- ❖ Analyze, forecast and efficiently plan your orders
- ❖ Get accurate statistics on your suppliers' performance through flexible reporting:
  - Delivery delays, negotiated discounts on prices, quantities purchased, etc.
  - Integrate purchases with analytic accounting to analyze your contracts' profitability.

# Manufacturing Resource Planning

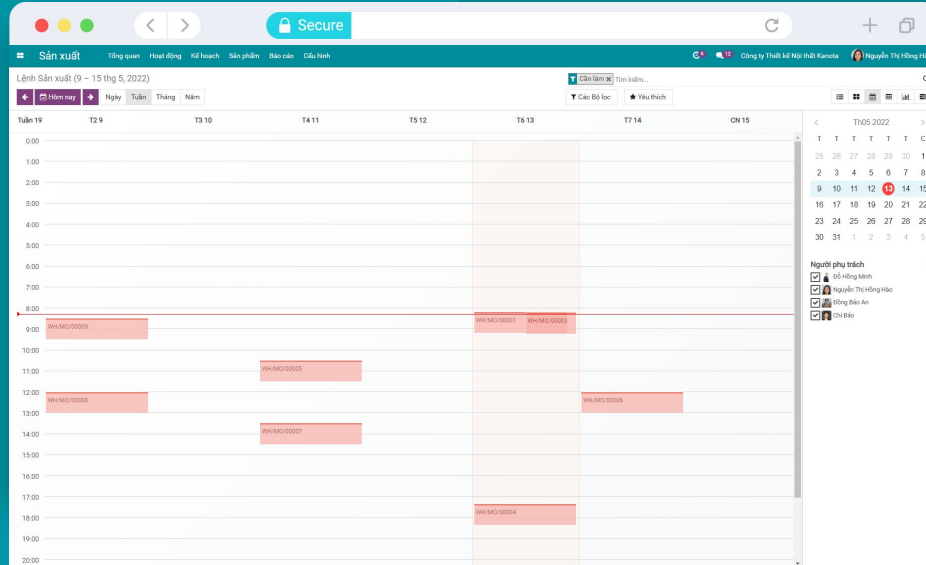

- Manage Bill of Materials (BoM), plan manufacturing orders, track work orders
- Manage all your assembly and/or manufacturing operations.
- Schedule manufacturing orders and work orders automatically.

- Review planning with the smart kanban and gantt views.
- Use the advanced analytics features to detect bottlenecks in resources capacities and inventory locations.

# Manufacturing Resource Planning

Efficient Scheduling of Manufacturing Orders

Automatically schedule manufacturing orders and work orders based on your procurement rules, quantities forecast and dependent demand.

# Manufacturing Resource Planning

Define Flexible Master Data

The screenshot displays a web-based MRP system interface. At the top, there's a navigation bar with tabs like 'Sản xuất', 'Tổng quan', 'Hoạt động', 'Kế hoạch', 'Sản phẩm', 'Báo cáo', and 'Cấu hình'. Below this, a breadcrumb trail shows 'Lệnh Sản xuất / WH/MO/00004'. The main content area is titled 'WH/MO/00004' and contains a form with the following fields:

- Sản phẩm:** [A07] Bàn trà mặt kính chữ T
- Số lượng:** 10.00 Bô To Produce
- Ngày theo kế hoạch:** 13/05/2022 17:20:52
- Người phụ trách:** Nguyễn Thị Hồng Hào
- Địa chỉ:** Công ty TNHH Kế Núi Thái Kanota

Below the form, there's a table with columns 'Thành phần', 'Hoạt động sản xuất', 'Phụ phẩm', and 'Khác'. The table lists three items:

Sản phẩm	Cần tiêu thụ	Đơn vị tính
[A02] Bàn đệm khung gỗ	10.00	Bô
[A02] Bàn trà cao CoCo	50.00	Bô
[B01] Ghế bập bênh thư giãn lưng tựa bọc đệm	2.00	Bô

At the bottom, there's a status bar showing 'Giải tin', 'Ghi chú', 'Ấn định hoạt động', and a user profile for 'Nguyễn Thị Hồng Hào' with the role 'Lệnh Sản xuất được tạo'.

Products, bill of materials and routings

Have the flexibility to create multi-level bills of materials, optional routing, version changes and phantom bills of materials.

You can use BoM for kits or for manufacturing orders.

# Manufacturing Resource Planning

Schedule Work Orders

Check resource capacities and fix bottlenecks

Define routings and plan the working time and capacity of your resources.

Quickly identify resource requirements and bottlenecks to ensure your production meets your delivery schedule dates.

# Manufacturing Resource Planning

A Productive User Interface

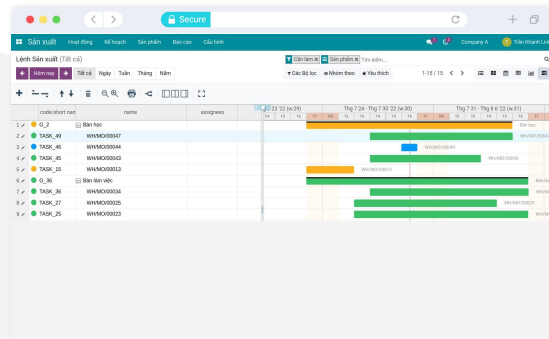

This software allows you to organize manufacturing orders and work orders in any way you like.

Process upcoming orders from the list view, control in the calendar view and edit the proposed schedule in the Gantt view.

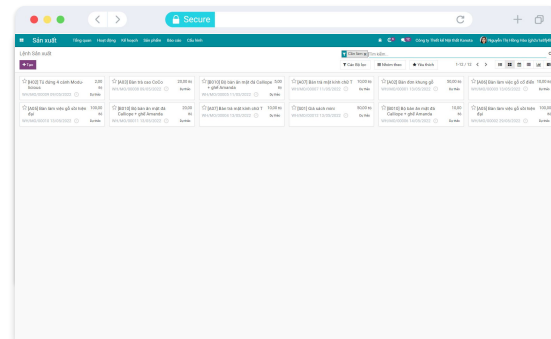

## List View

Order ID	Order Name	Order Type	Order Status	Order Date	Order Due Date	Order Location	Order Description	Order Details

# Sales Management

## Easy, streamlined communications

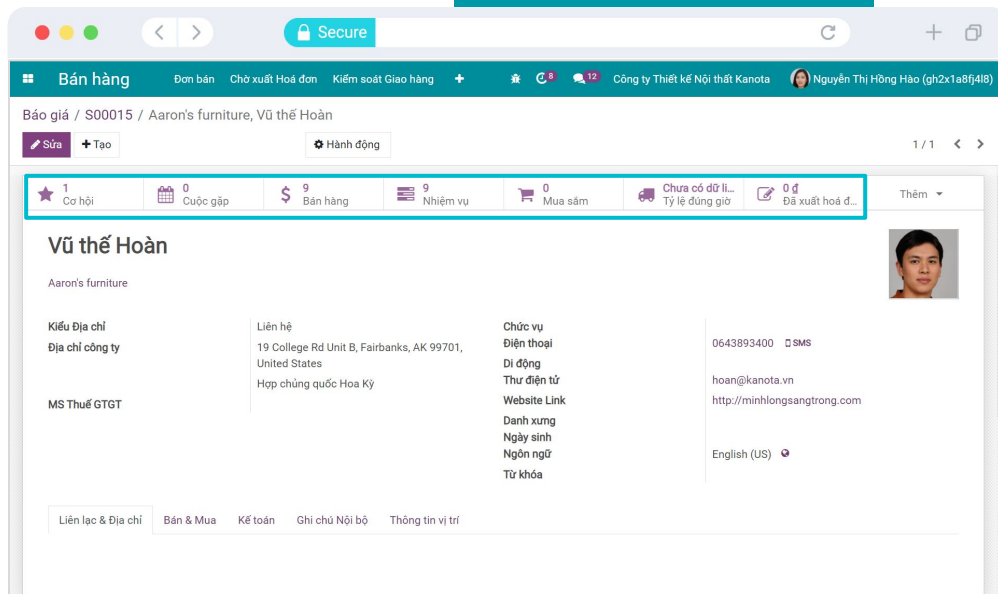

- Faster communications, boosted sales
- Use templates to create polished, professional quotes in minutes.
- Send these quotations by email and let your customer sign online. Everything you need to know can be found in one place. Send offers with clear pricing to your customers and let them accept it, reject it or ask for more information.
- Communicate with customers directly through the messaging software and see the whole history of the conversation in the quotation.
- The chatter feature enables you to communicate faster and more efficiently with your customer. This takes place directly on a quotation or sale order from within Viindoo or via email.
- Get all the negotiations and discussions attached to the right document and relevant managers notified on specific events.

# Sales Management

## Fully Integrated

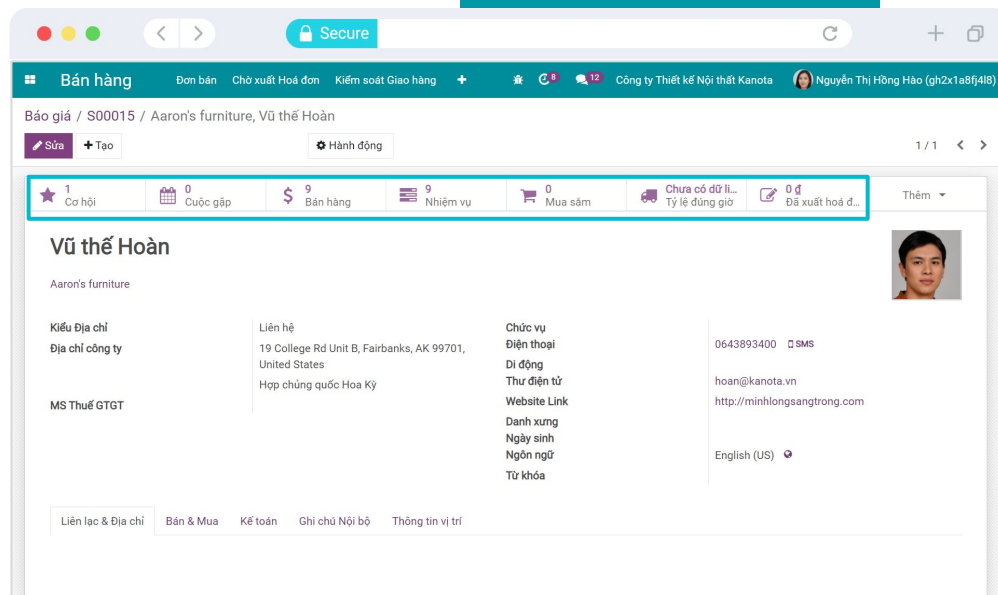

- The information you need, where you need it
- Don't lose time just looking for customers, products or contracts related information; they are all conveniently accessible when creating quotations.
- Get access to stock availabilities in the different warehouses, to customer's specific prices, to the history of previous offers for this prospect, etc.

# Sales Management

## Your Address Book

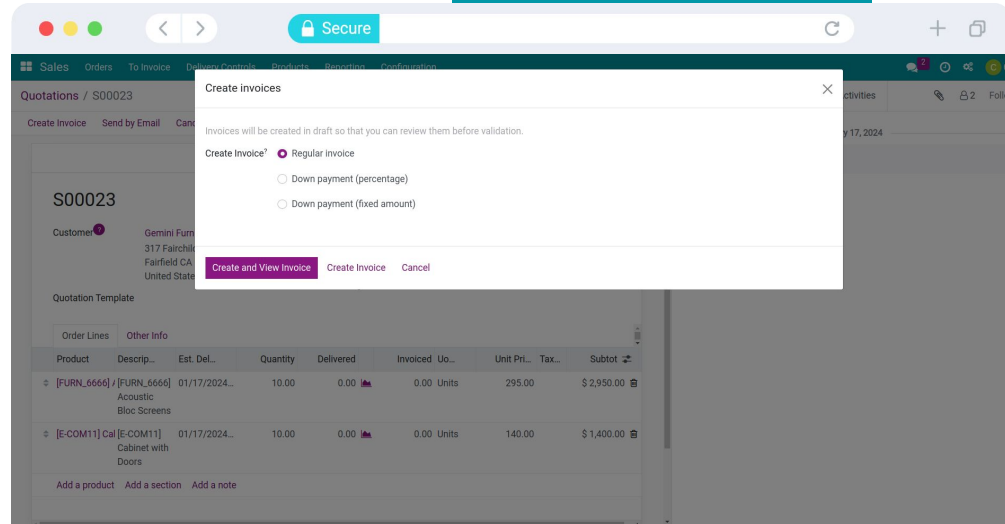

- So many features, so easy to use
- Assign tags to your prospects, manage relationships between contacts and store all customer's preferences including pricing, billing conditions, addresses, payment terms, etc.
- Navigate through all the documents related to a customer with the powerful breadcrumb: quotations, invoices, emails, meetings.

# Sales Management

## Fully Integrated Invoicing

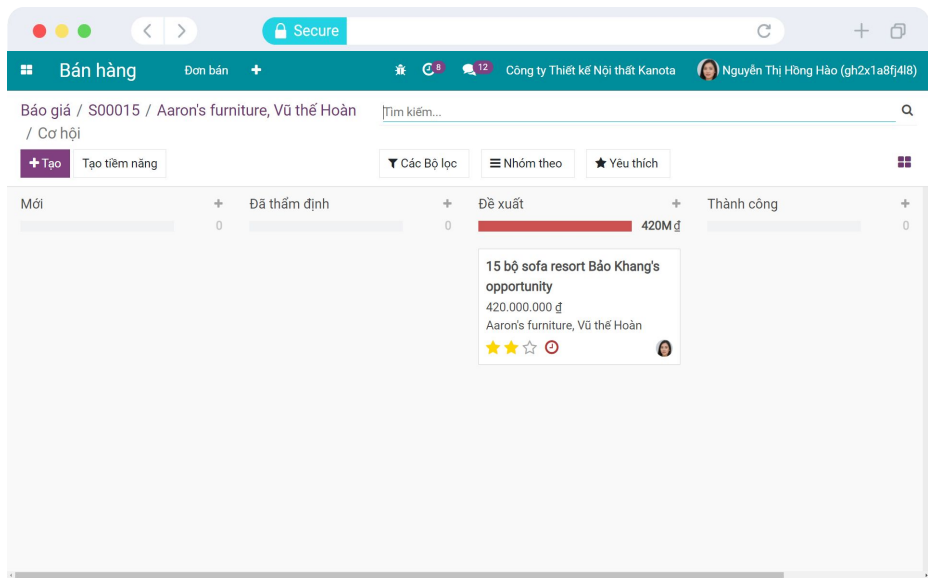

- Support all the invoicing methods you need whether you invoice based on time and materials, on delivery orders or fixed price; Viindoo supports all possible methods.
- Get recurring invoices produced automatically, create advances in just a few clicks, re-invoices expenses easily, etc.

# Sales Management

## Built-in Customer Relationship Management

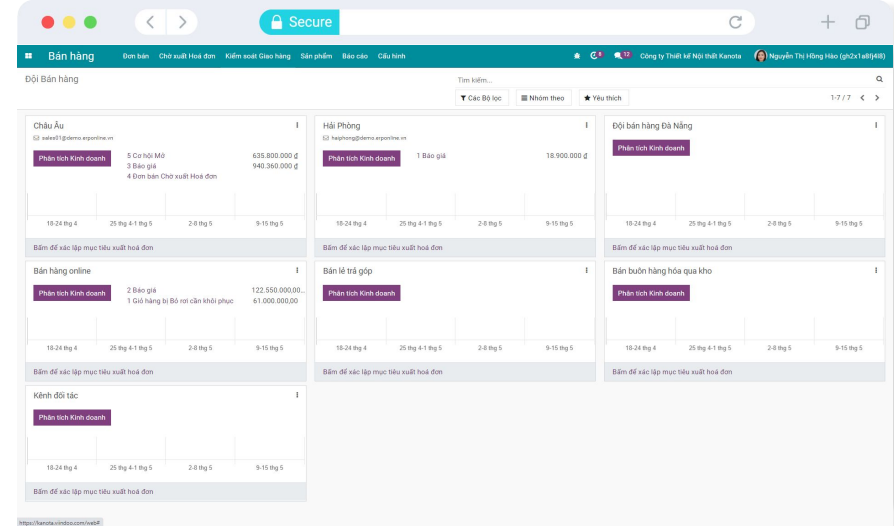

- Activate the CRM application to manage your funnel of opportunities, attract leads, log calls, schedule meetings and launch marketing campaigns.
- Opportunities can be converted into quotations in just one click.

# Sales Management

## Drive Engagement with Gamification

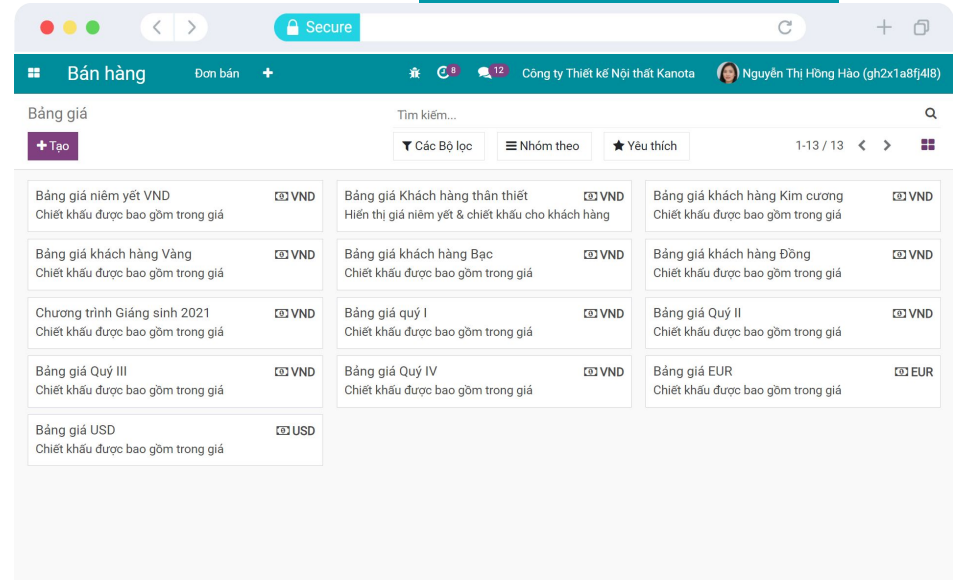

- Align Sales On Clear Targets
- Define clear targets and commission plans.
- Get real time statistics on the performance of individual sales or teams.
- Motivate your teams with challenges, rewards and leaderboards.

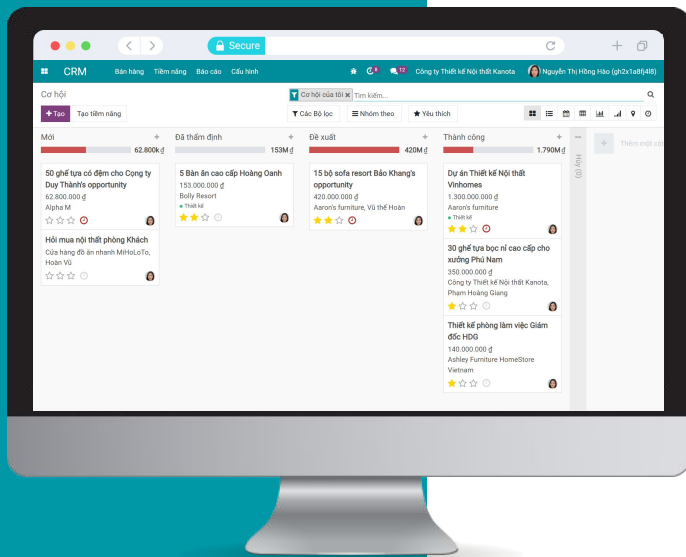

# Sales Management

## Have Clear Pricing Strategies

- Use pricelists to record special conditions for a specific customer or to define prices for a segment of customers.
- Define promotions and have them applied automatically for all your sales teams.

# Customer Relationship Management (CRM)

- Boost sales productivity, improve win rates, grow revenue
- Manage your sales funnel with no effort.
  - Attract leads, follow-up on phone calls and meetings.
  - Analyse the quality of your leads to make informed decisions and save time by integrating emails from all your contacts directly into the application.

# CRM

## Viindoo CRM Software

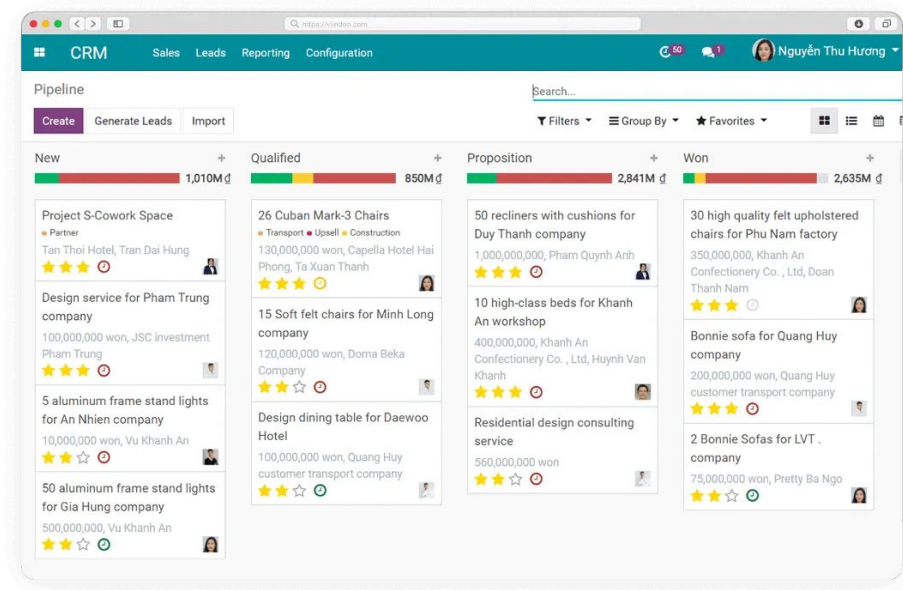

- Comprehensive  
Customer Relationship  
Management Software

# CRM

## A Great Kanban View to Track Your Pipeline

- Track your opportunities pipeline with the revolutionary kanban view in a few simple steps.
- Work inside your sales funnel and get instant visual information about next actions, new messages, top opportunities and expected revenues.
- Boost your sales with our great management software for businesses of any size.

# CRM

## Public Social Network Integration

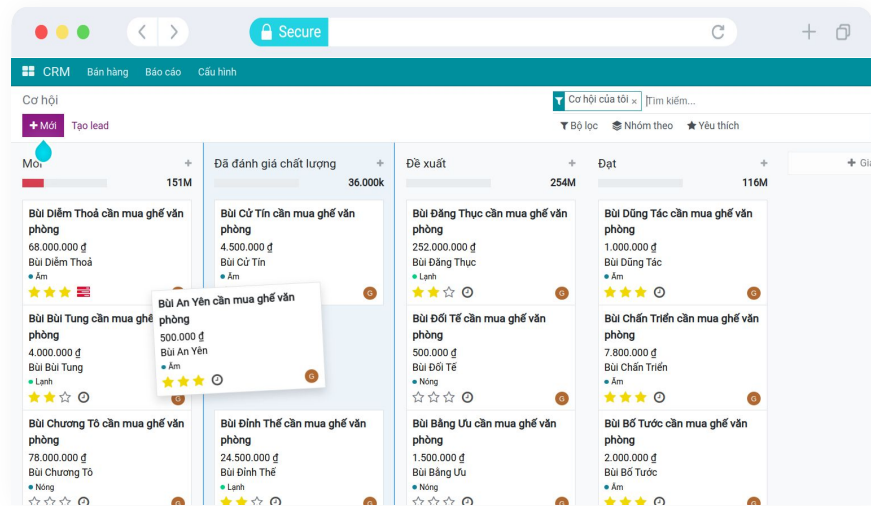

- CRM integrates with social networks
- Chat directly with customers from social networks Facebook, LinkedIn and create sales leads automatically in CRM

# CRM

Stay focus on growing your business

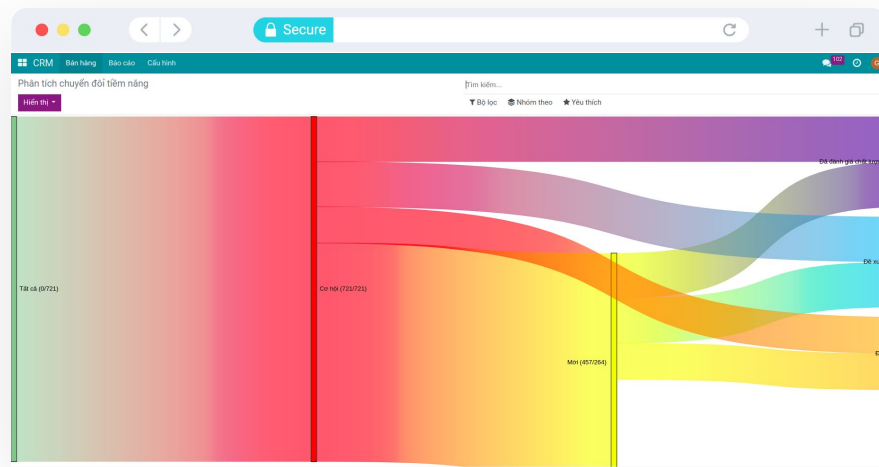

- Drag and drop your opportunities from one stage to another in just one click.
- Better manage your salesmen by having a complete overview of your teams and their pipes.

# CRM

Lead Management Made Easy

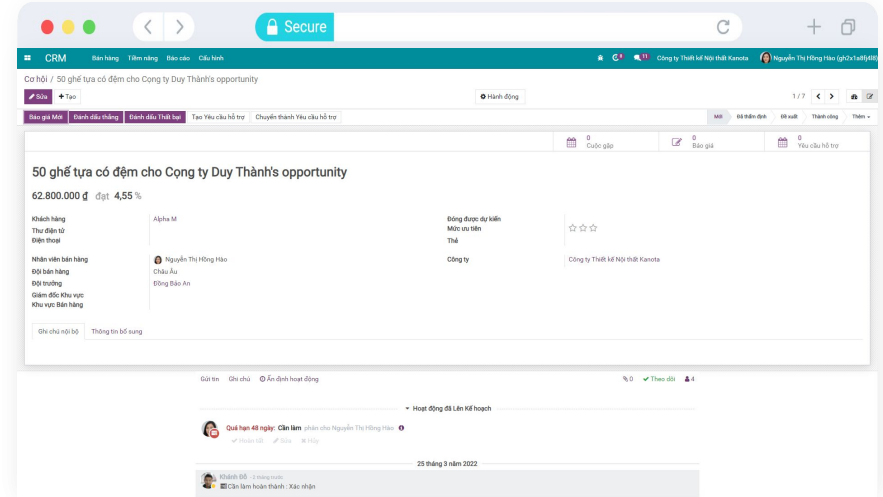

- Automatically create leads from incoming emails.
- Analyse leads efficiently and compare performance by campaign, department, channel or sales team.
- Find duplicates, merge leads and assign them to the right salesperson in one operation.
- Spend less time on administration and more time on qualifying leads.

# CRM

## Organize Your Opportunities

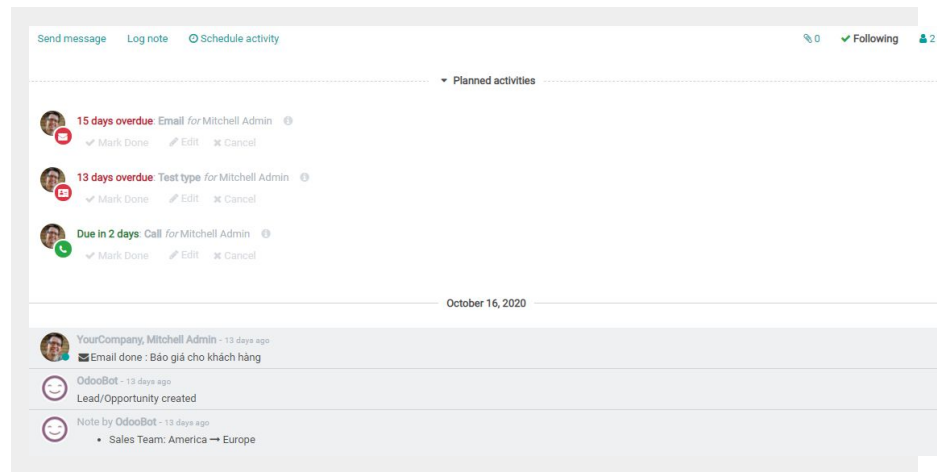

- Clean user interface with everything on one screen
- Organize your opportunities so you can stay focused on the best deals.
- Manage all customer interactions from the opportunity like emails, phone calls, internal notes, meetings and quotations.
- Follow opportunities that interest you and be notified about specific events: deal won or lost, stage changed, new customer demand, etc.

# CRM

## Email Integration and Automation

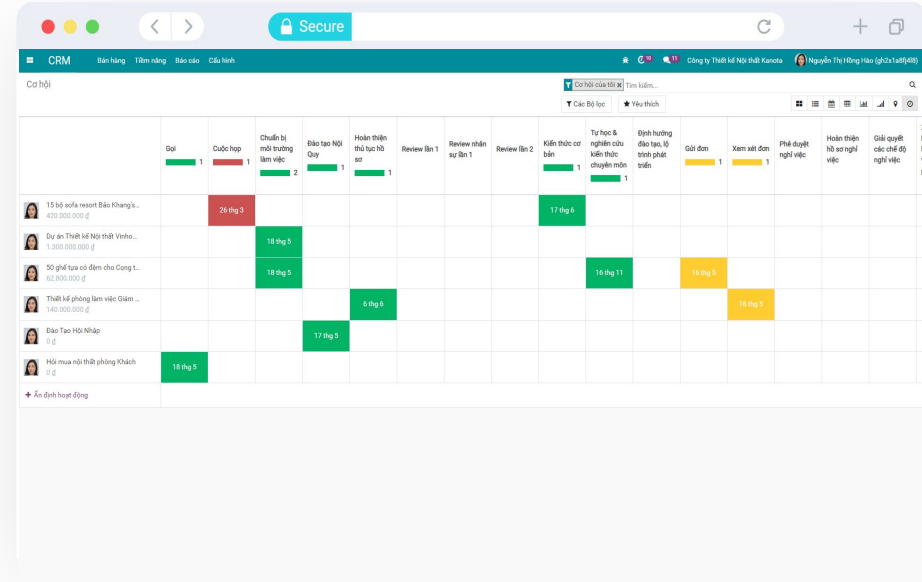

- Work with the email applications you already use every day. Whether your company uses Microsoft Outlook or Gmail, no one needs to change the way they work, so everyone stays productive.
- Route, sort and filter incoming emails automatically. Odoo CRM handles incoming emails and routes them to the right opportunities or sales team.
- New leads are created on the fly and interested salespeople are notified automatically.

# CRM

## Collaborative Agenda

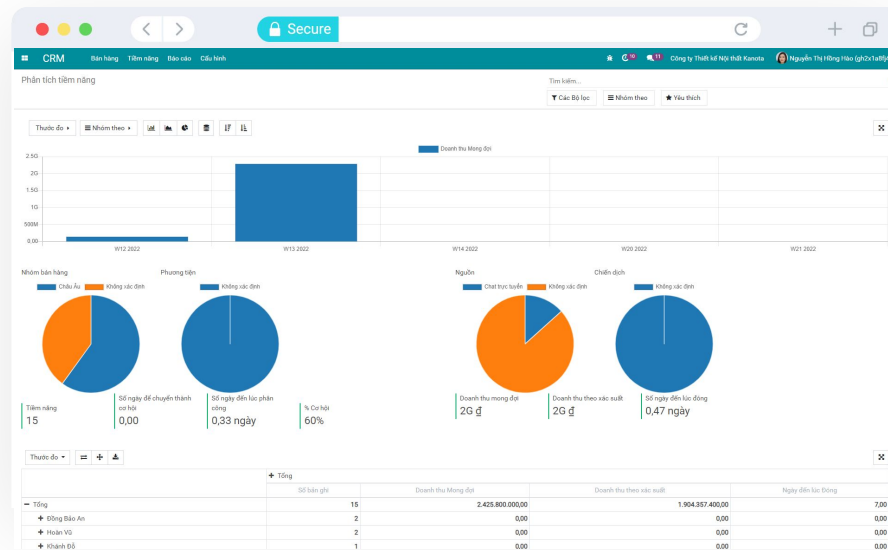

- Schedule your meetings and phone calls using the integrated calendar.
- You can see your agenda and your colleagues' agenda in one view.
- As a manager, it's easy to see what your team is currently working on and to set up a timeline for certain tasks.

# CRM

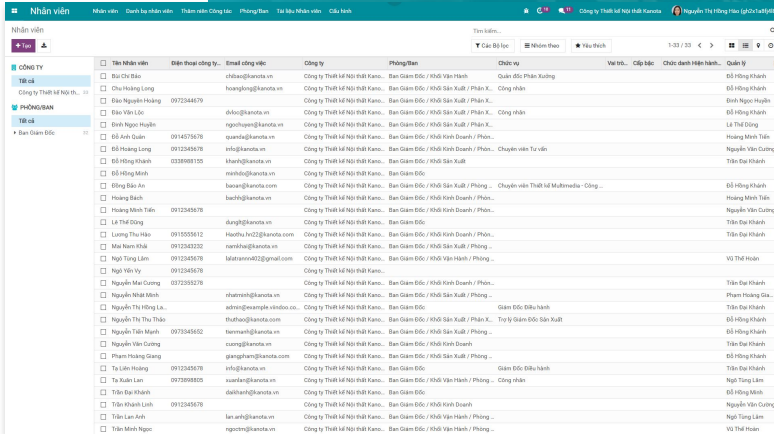

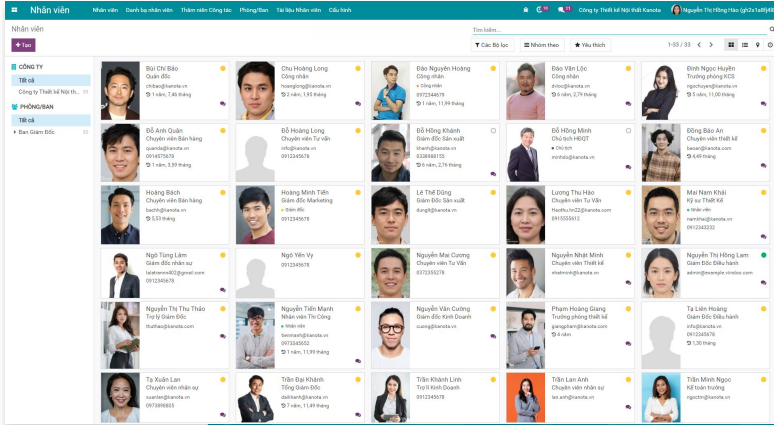

## Advanced analytics reports

- Get the insights you need to make smarter decisions.
- Design custom dashboards to get a picture of your business at a glance.
- Dig deeper with real-time reports and flow charts that anyone can create and share.

# Human Resource Management

- Manage the most important asset in your company: People
- Get all your HR operations managed easily: knowledge sharing, recruitment system, appraisals, timesheets, contracts, attendance, payroll, etc.
- Thanks to Odoo's HR tools, you can satisfy each one of your HR needs by a specific app that you activate on demand and all information are stored in the cloud.

# Human Resource Management

## Successfully Manage Your Employees

The screenshot displays the Viindoo HR Management software interface. The main view shows the profile of Anita Oliver, an Experienced Developer. The interface includes a top navigation bar with tabs for Employees, Emploees, Seniority, Departments, Employee Documents, Configuration, and My Company (San Francisco). Below the navigation bar, there are tabs for Launch Plan, In Contract, 4/20 Days, Equipments, HR Document, Assignments, and Timesheets. The profile section for Anita Oliver includes her photo, name, title, and contact information. A sidebar on the left shows tabs for Resume, Work Information, Private Information, HR Settings, and Accounting. The main content area displays a table of skills and experience. The skills table lists various skills with proficiency levels and progress bars. The experience table lists various roles with dates and descriptions.

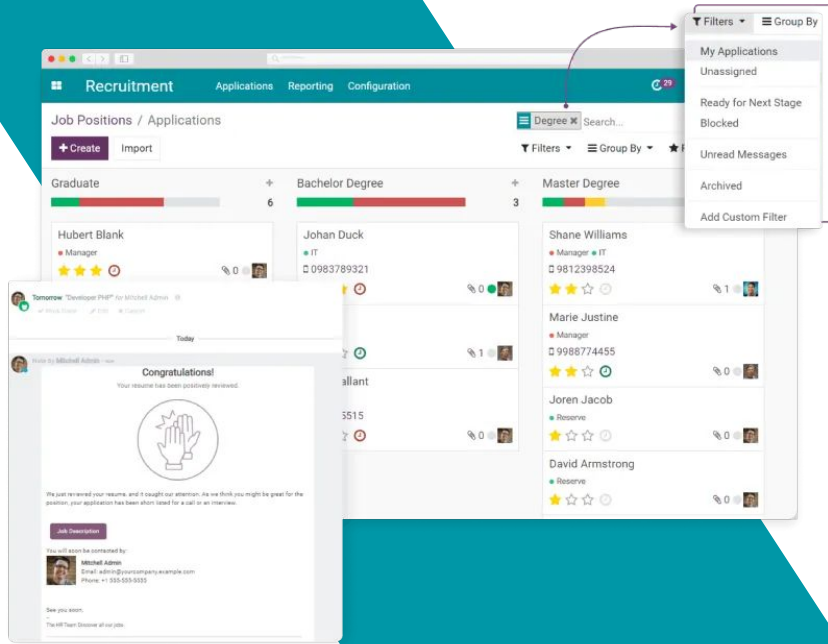

Skills	Level	Progress
Dev		
JavaScript	Elementary	
Music		
Violin	L4	
Piano	L3	75%
Singing	L2	50%
Flute	L2	50%
Marketing		
Public Speaking	L3	75%
Email Marketing	L2	50%
Communication	L1	25%
CMS	L1	25%

Experience	Start Date	End Date	Role
Robinson, Crawford and Norman	10/20/2011	04/20/2018	Psychiatric nurse
Burns, Lester and Cuevas	04/20/2012	05/20/2018	Police officer
Parker, Robertson and Acosta	05/20/2013	04/20/2018	Science writer
Hill Group	05/20/2012	04/20/2018	Glass blower/designer

- Viindoo software offers you various ways to oversee all important information in your company's address book.
- Some information are restricted to HR managers, others are public for all employees to easily find their colleagues.
- You can record employee contracts and get alerts when they have to be renewed.

# Human Resource Management

## Streamline Your Recruitment Process

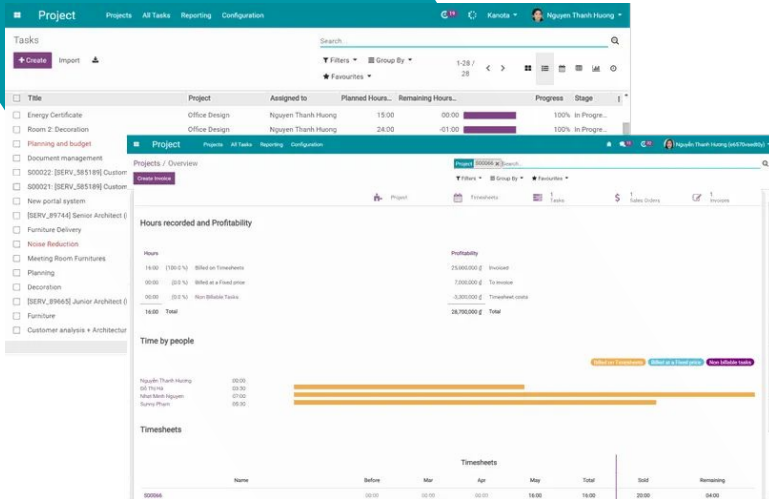

- Index resumes, track applicants, search profiles
- Post job offers and keep track of each application received. Follow applicants in your recruitment process with the smart kanban view.
- Save time by automating some communications with email templates. Resumes are indexed automatically, allowing you to easily search for specific profiles.
- You can make your own settings, for example: Each applicant who'll provide a resume and a cover letter will be automatically put into your system in the stage "Applied"

# Human Resource Management

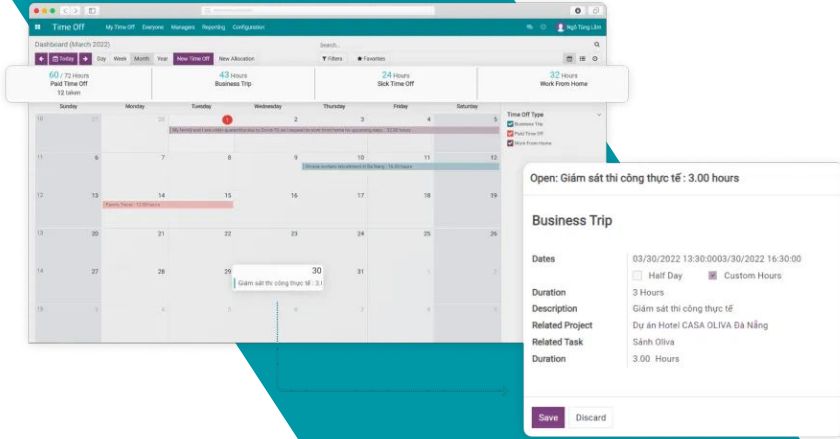

## Track Time and Attendance

- Weekly or monthly timesheets with optional attendance tracking
- Keep track of the time spent by project, client or tasks.
- It's easy to see the statistics, to record timesheets and to check the attendance of each employee.
- Get your analytic accounting posted automatically based on the time spent on your projects.

# Human Resource Management

## Time-off Management

- Weekly or monthly timesheets with optional attendance tracking
- Keep track of the time spent by project, client or tasks.
- It's easy to see the statistics, to record timesheets and to check the attendance of each employee.
- Get your analytic accounting posted automatically based on the time spent on your projects.

Employee submits a time-off request.

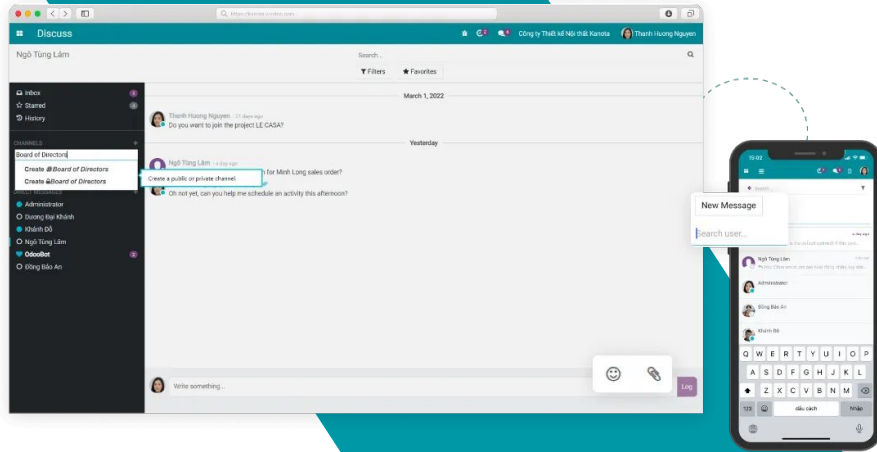

Direct manager approves or rejects.

Notification sent to the employee and displayed on the calendar.

# Human Resource Management

## Enterprise Social Network

- Collaborate across departments, geographies and business applications
- Break down information silos. Share knowledge and best practices amongst all your employees. Follow specific people or documents and join groups of interests to share expertise and files.
- Interact with your colleagues in real time with live chat. This feature is great for big offices, for companies with multiple offices and even for some employees who work from home and need to be in instant touch with their colleagues.

# Human Resource Management

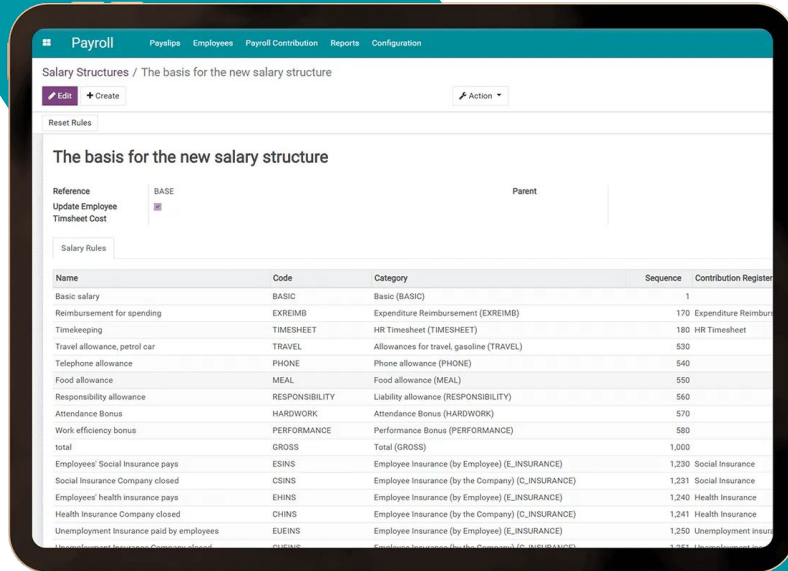

## Tracking System for Employee Expenses

Expense Date	Description	Employee	Paid By	Company	Next Activity	Taxes	Total	Status
							\$289.00 to report	
							\$0.00 under validation

Submitted (7)								1,097.83
<input type="checkbox"/>	10/05/2021	Paintball	Keith Byrd	Employee (to reimburse)	My Company (San Francisco)		\$ 300.00	Submitted
<input type="checkbox"/>	10/05/2021	Drinks	Keith Byrd	Employee (to reimburse)	My Company (San Francisco)		\$ 42.50	Submitted
<input type="checkbox"/>	10/05/2021	Pizzas	Keith Byrd	Employee (to reimburse)	My Company (San Francisco)		\$150.00	Submitted
<input type="checkbox"/>	06/02/2021	Lamp	Ronnie Hart	Employee (to reimburse)	My Company (San Francisco)		\$ 28.99	Submitted
<input type="checkbox"/>	06/02/2021	Chairs	Ronnie Hart	Employee (to reimburse)	My Company (San Francisco)		\$334.50	Submitted
<input type="checkbox"/>	01/15/2021	Lunch with Customer	Marc Demo	Employee (to reimburse)	My Company (San Francisco)		\$152.80	Submitted
<input type="checkbox"/>	01/15/2021	Travel by Car	Marc Demo	Employee (to reimburse)	My Company (San Francisco)		\$ 79.04	Submitted
							\$625.75	

- Get rid of the paperwork and follow employees' expenses in an online form directly in Viindoo.
- Don't lose time or money by controlling the full flow:
  - expense validation,
  - reimbursement of employees,
  - posting in the accounting
  - and re-invoicing to customers.

# Human Resource Management

## Payroll & Employee Insurance

The screenshot displays a web application for payroll management. The top navigation bar includes 'Payroll', 'Paylips', 'Employees', 'Payroll Contribution', 'Reports', and 'Configuration'. The main heading is 'Salary Structures / The basis for the new salary structure'. Below this, there are buttons for 'Edit', 'Create', and 'Action'. A 'Reset Rules' button is also present. The main content area is titled 'The basis for the new salary structure' and contains a table with columns: Name, Code, Category, Sequence, and Contribution Register. The table lists various salary components such as Basic salary, Reimbursement for spending, Timekeeping, Travel allowance, Telephone allowance, Food allowance, Responsibility allowance, Attendance Bonus, Work efficiency bonus, and total GROSS. It also includes rows for Social Insurance, Health Insurance, and Unemployment Insurance, each with a corresponding contribution register entry.

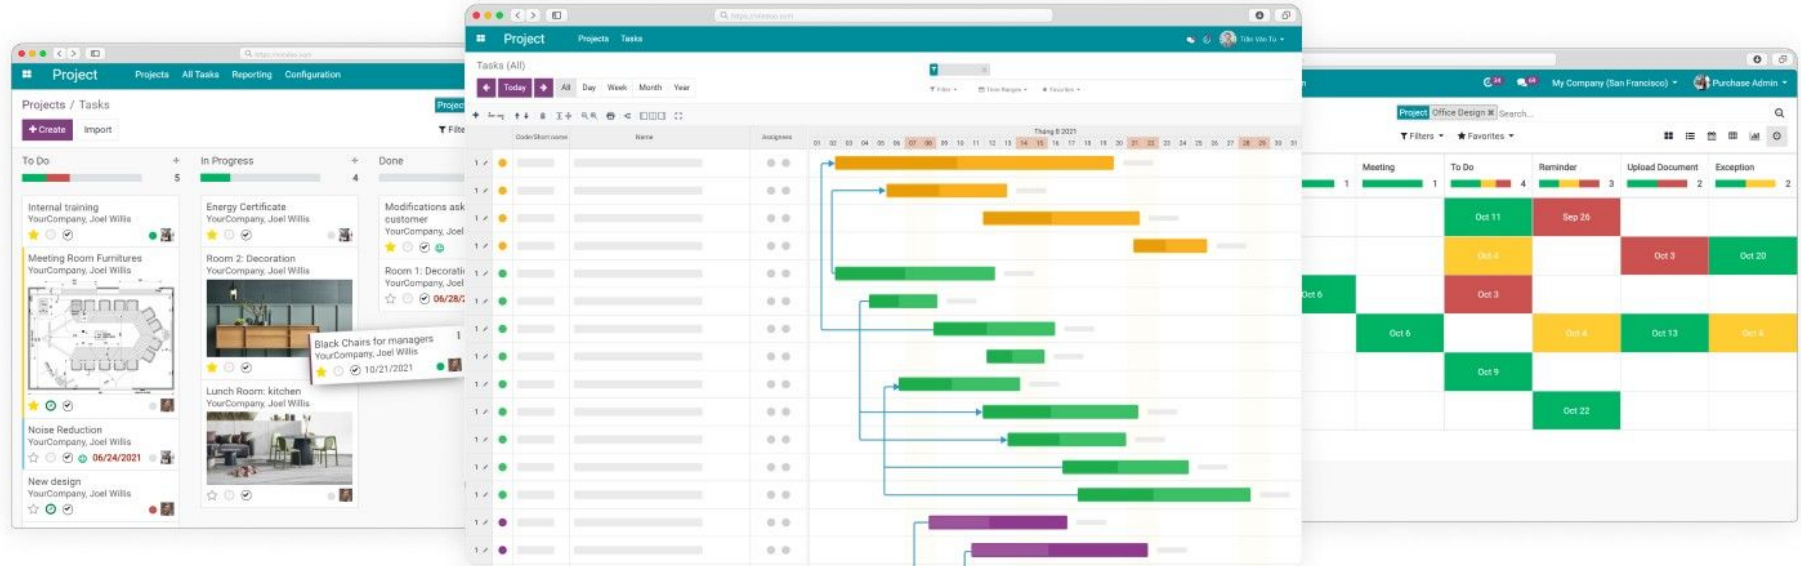

Name	Code	Category	Sequence	Contribution Register
Basic salary	BASIC	Basic (BASIC)	1	
Reimbursement for spending	EXREIMB	Expenditure Reimbursement (EXREIMB)	170	Expenditure Reimbursement
Timekeeping	TIMESHEET	HR Timesheet (TIMESHEET)	180	HR Timesheet
Travel allowance, petrol car	TRAVEL	Allowances for travel, gasoline (TRAVEL)	530	
Telephone allowance	PHONE	Phone allowance (PHONE)	540	
Food allowance	MEAL	Food allowance (MEAL)	550	
Responsibility allowance	RESPONSIBILITY	Liability allowance (RESPONSIBILITY)	560	
Attendance Bonus	HARDWORK	Attendance Bonus (HARDWORK)	570	
Work efficiency bonus	PERFORMANCE	Performance Bonus (PERFORMANCE)	580	
total	GROSS	Total (GROSS)	1,000	
Employees' Social Insurance pays	ESINS	Employee Insurance (by Employee) (E_INSURANCE)	1,230	Social Insurance
Social Insurance Company closed	CSINS	Employee Insurance (by the Company) (C_INSURANCE)	1,231	Social Insurance
Employees' health insurance pays	EHINS	Employee Insurance (by Employee) (E_INSURANCE)	1,240	Health Insurance
Health Insurance Company closed	CHINS	Employee Insurance (by the Company) (C_INSURANCE)	1,241	Health Insurance
Unemployment Insurance paid by employees	EUEINS	Employee Insurance (by Employee) (E_INSURANCE)	1,250	Unemployment Insurance
Unemployment Insurance Company closed	CEUEINS	Employee Insurance (by the Company) (C_INSURANCE)	1,251	Unemployment Insurance

- With the built-in generic payroll system that is ready to integrate with country specific payroll system and payroll accounting
- You can build multiple employee salary structures, get thousand pay slips generated either manually or automatically

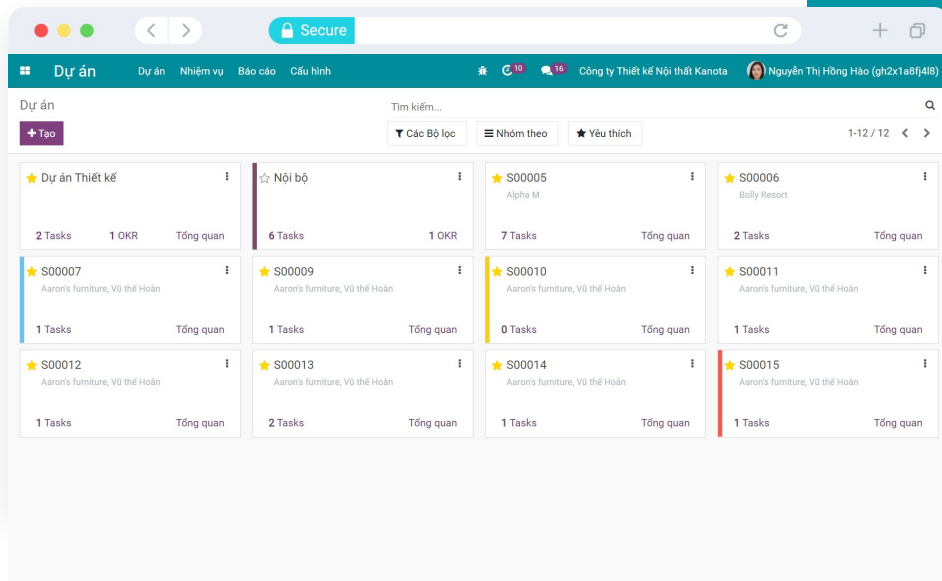

# Project Management

Designed To Fit Your Own Needs

Organize projects around your own processes.

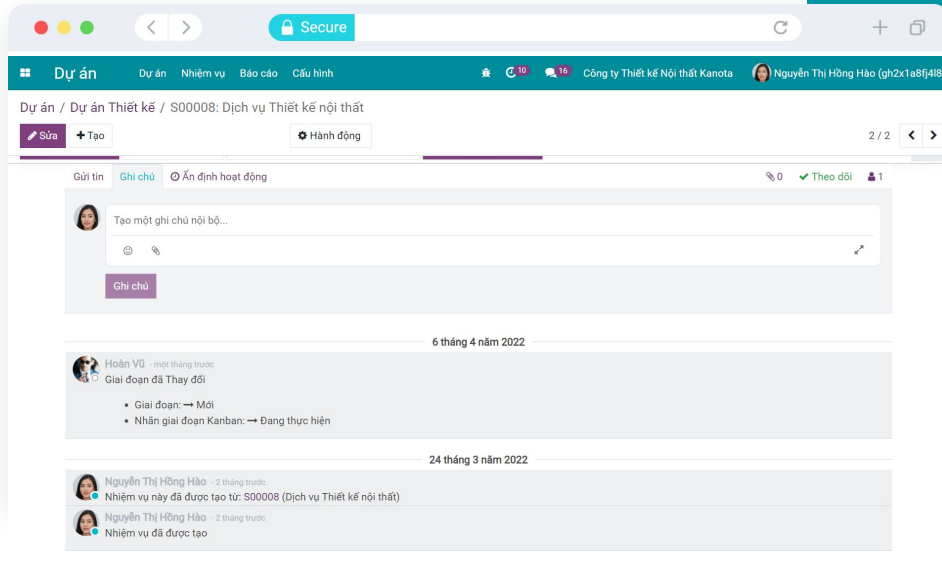

# Project Management

- Easy To Use
- Get organized as fast as you can think. This easy-to-use interface takes no time to learn and every action you do is instantaneous. There's nothing standing between you and your sweet productive flow.
- Incoming emails are integrated automatically to create new tasks and issues on the fly, allowing you to collaborate easily with customers.

# Project Management

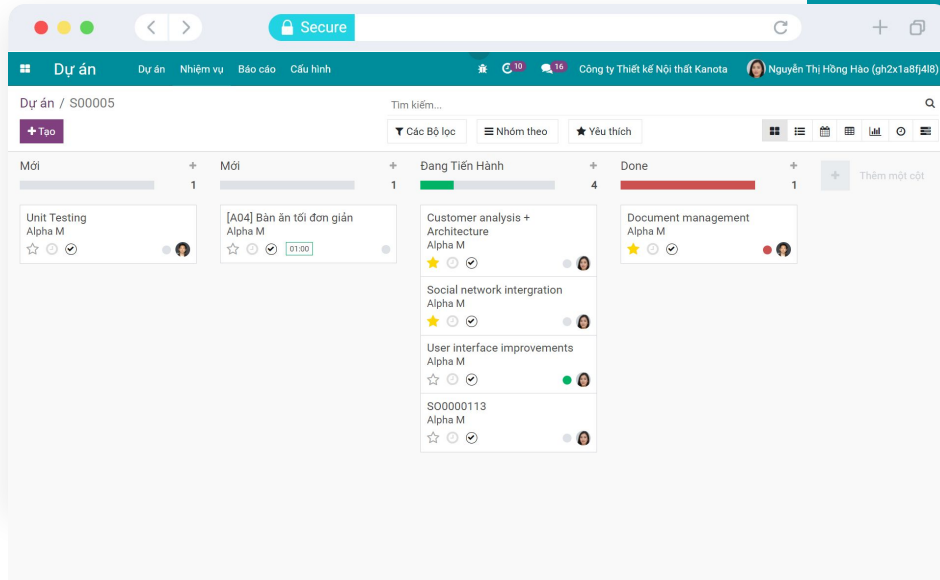

## Work Together

- Chat in real time, share documents, integrate your emails
- Use the open chatter to communicate with your team or with your customers and share documents and comments on tasks and issues.
- Integrate all your discussions fast with the email integration.
- Talk to others users or customers with the live chat feature, which can help you to find quick solutions for any issue with your project.

# Project Management

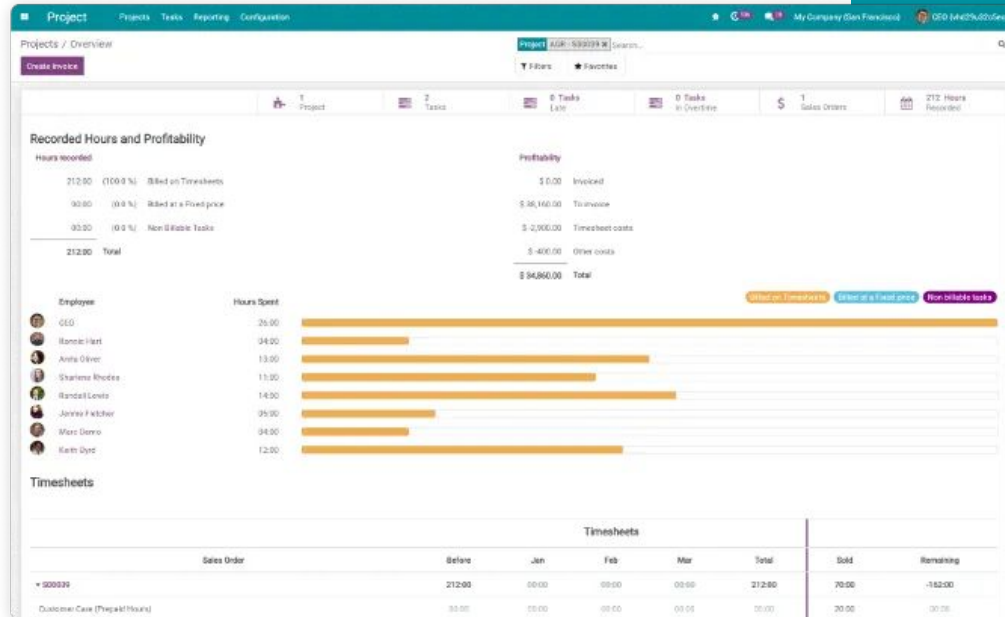

Get Work Done

- Get alerts on the projects and tasks that you follow in order to stay up to date with all that interests you.
- Use instant green/red visual indicators to scan through what has been done and what requires your attention.

# Project Management

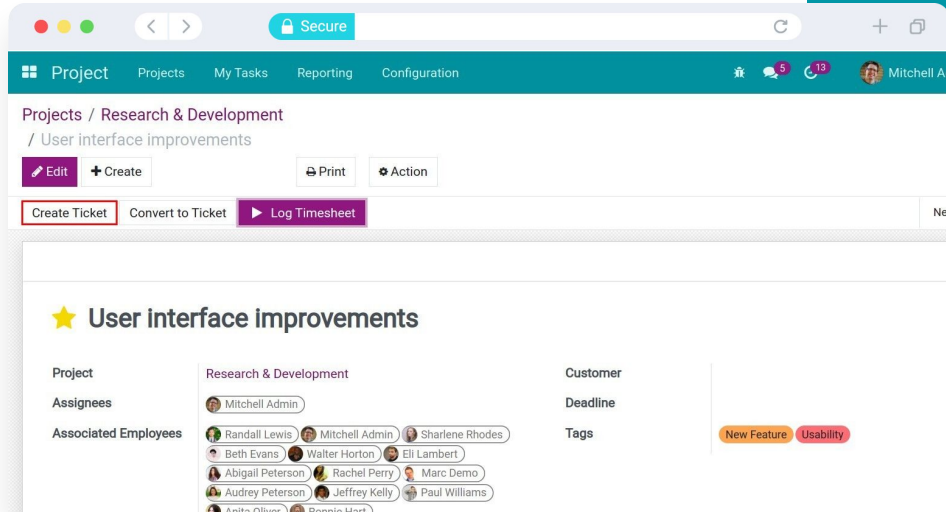

## Timesheets, Contracts & Invoices

- Projects are automatically integrated with customer contracts allowing you to prepare an invoice based on time & materials and to record timesheets easily.

# Project Management

## Track Issues & Give the best customer service

- Support services, helpdesk, bug tracker, etc.
- Single out the issues that arise in a project in order to have a better focus on resolving them.
- Integrate customer interaction on every issue and get accurate reports on the performance of your team.
- Keep mailboxes clean and well-organized thanks to a dedicated email address for each project.
- Keep customers and employees updated with automated actions for status update, and automatically create a new issue from incoming email.

# Website Builder & e-Commerce

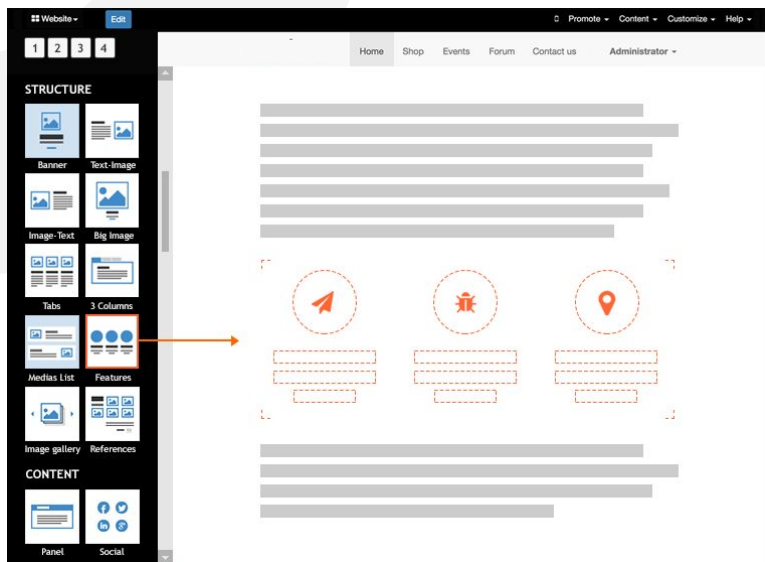

Edit Anything Inline & What you see is what you get.

- Create beautiful websites in Viindoo CMS (Content Management System) with no technical knowledge. Viindoo's unique 'edit inline' approach makes creating a website surprisingly easy.
  - No more complex backend;
  - just click and change any content anywhere you need.
- It's just simple:
  - Change the price of a product.
  - Put a title in bold.
  - Come up with a blog subtitle.
  - Do all of these on the go by just clicking and changing.

# Website Builder & e-Commerce

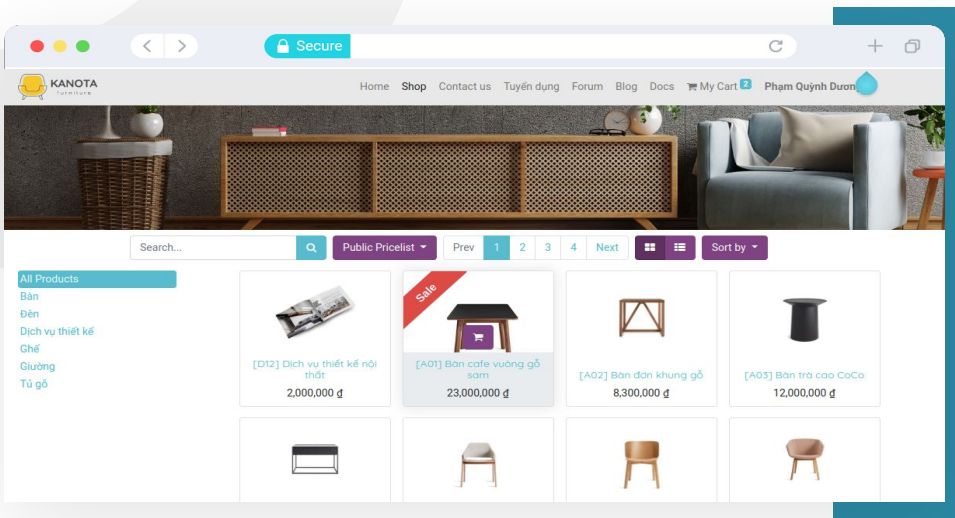

The best CMS: Awesome. Astonishingly Beautiful

- Simple design using clean building blocks
- Viindoo's building blocks allow you to design modern websites from scratch. It's extremely simple compared to the way other website builders work.
- Whether it's for products descriptions, blogs or static pages, you don't need to be a professional designer to create clean content when using Viindoo.
- Just drag, drop and customize default building blocks.

# Website Builder & e-Commerce

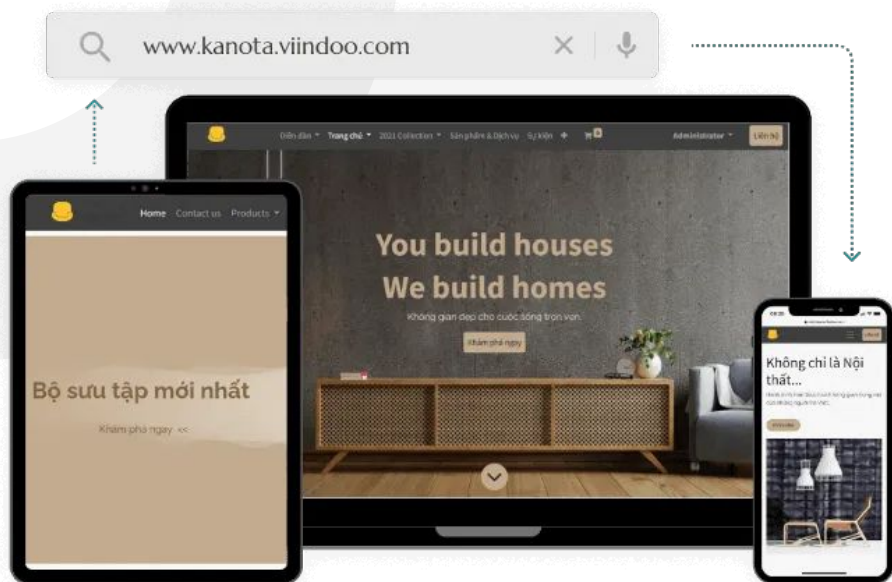

No synchronization. Full integration.

- Enterprise-ready, out-of-the-box
- Activate ready-to-use enterprise features in just a click: *E-commerce, Job announcements, Events, Blogs, Newsletter registration, etc.*
- Traditional eCommerce and CMS provide little integration with other systems because it's not their core focus. With Viindoo's integration, you benefit from the best management software to follow up on your orders, job applicants, leads and much more - all in an instant.

# Website Builder & e-Commerce

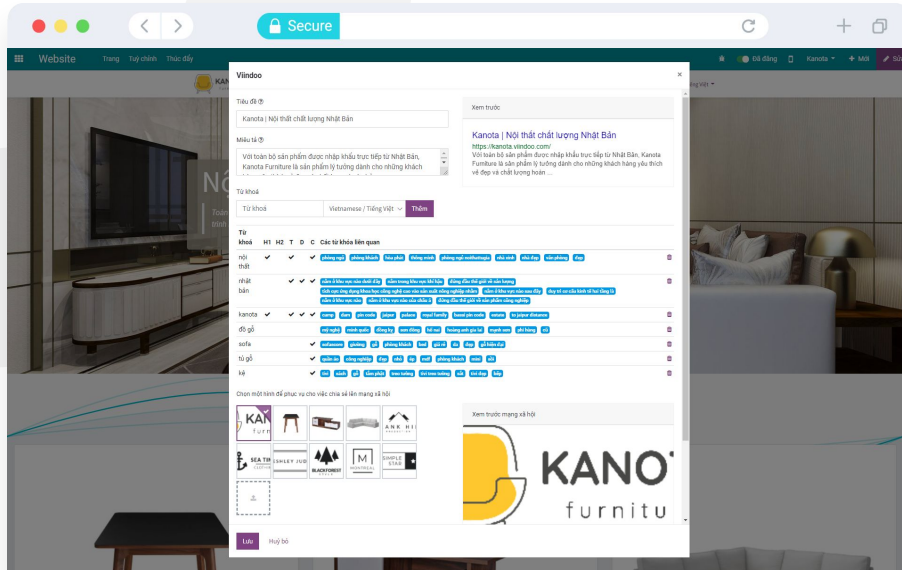

Great Mobile Experience

- Responsive content on all pages
- Get a mobile friendly website thanks to our responsive design. All your pages adapt automatically to the screen size on a mobile phone, tablet or desktop computer.
- You don't have to worry about if your website works when it's not being accessed from a desktop computer. With Odoo, your website and all the changes you make to it are instantly mobile friendly.

# Website Builder & e-Commerce

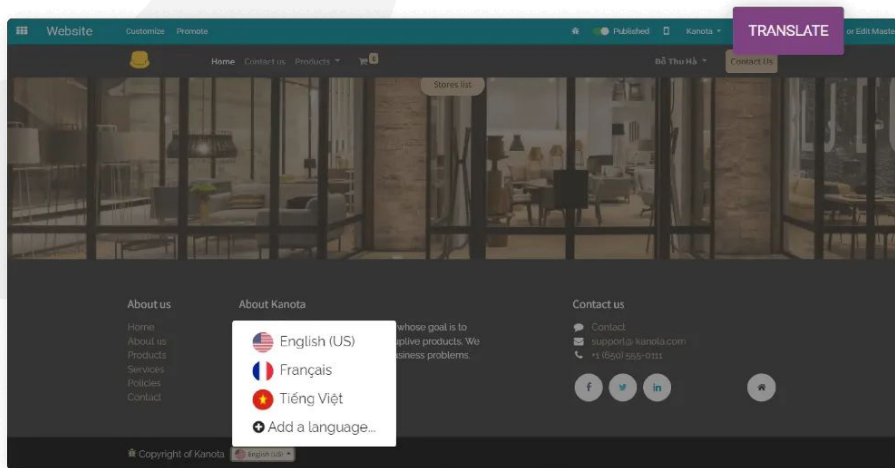

Attract More Visitors

- SEO tools at your fingertips
- Viindoo's "Promote" tool suggests keywords according to the most searched terms on Google. Search Engine Optimization tools are ready-to-use, with no configuration required.
- Google Analytics tracks your shopping carts by default. Sitemap and structured content are created automatically for Google indexing.

# Website Builder & e-Commerce

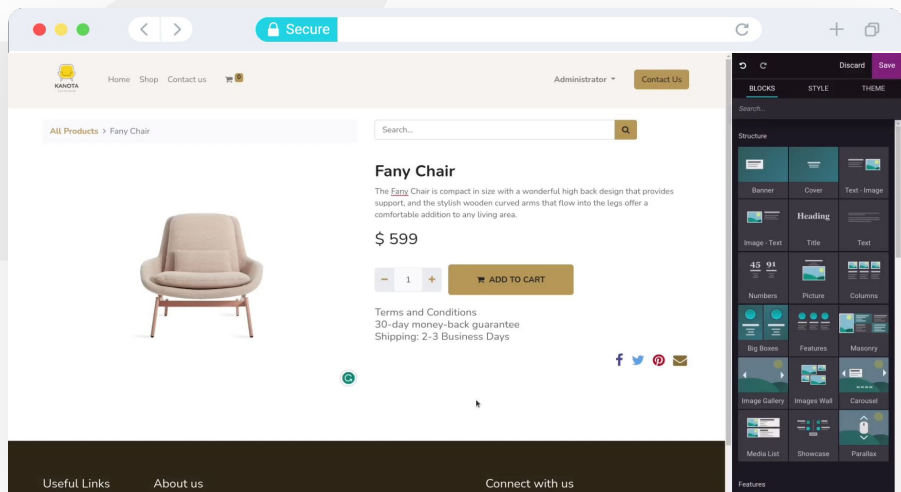

Multi Language Made Easy

- Rapid automatic translations
- Get your website translated to a professional standard in multiple languages with no effort.
- Benefit from professional translators to translate all your content automatically with the Gengo integration. When you edit the master page, Odoo makes the same changes in all other languages in just a few hours.

# Website Builder & e-Commerce

# Point of Sale (PoS)

## User-friendly Point of Sale

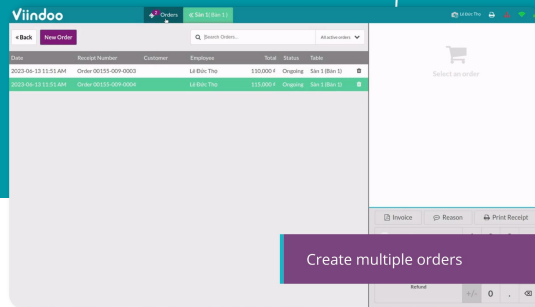

- Set-up in minutes, sell in seconds
- Viindoo online Point of Sale app is based on a smart interface that everyone can use without difficulty. The POS can be used online or offline and iPads, Android tablets or laptops.
- Viindoo POS is fully integrated with the inventory app and accounting app. It means that any transaction that you make with your the POS will automatically be input into your inventory management and accounting. Our POS includes extra features such as customer service and creation of invoices.
- You will be able to run real time statistics and consolidations across all your shops without the hassle of integrating several applications.

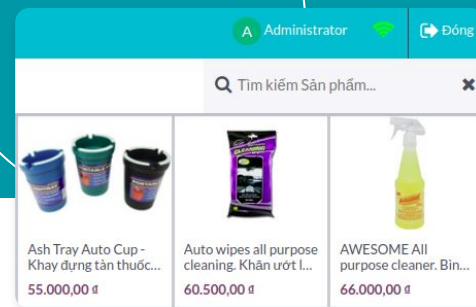

## Simple and beautiful

Say goodbye to ugly, outdated POS systems and enjoy the Viindoo web interface designed for the modern retailer.

## Serve multiple customers at the same time

Whether it's for a restaurant or a shop, you can activate multiple tickets in parallel so you won't keep your customers waiting.

## Blazing fast search

Scan products, browse through hierarchical categories or quickly get information about products with fast filtering across all your items.

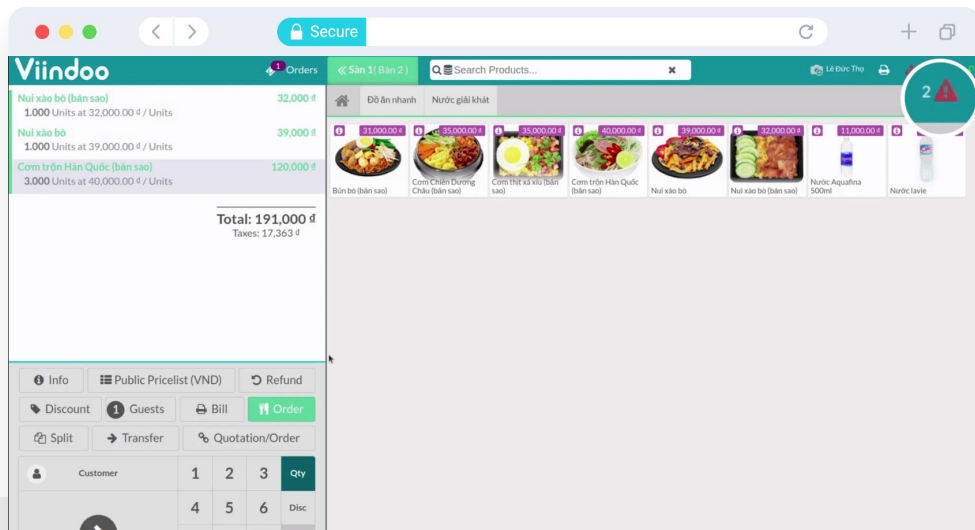

# Point of Sale (PoS)

An interface designed for productivity

## Point of Sale (PoS)

Online or offline interface, compatible with any hardware

- Set up new stores quickly and easily with just an internet connection. Then use your POS everywhere, anytime.
- While an internet connection is required to start the Point of Sale, it will stay operational even after complete disconnection.
- No installation and no specific hardware is required to use Viindoo POS. Our SAAS solution for point of sales is compatible with desktop PCs, iPads and other tablet computers, laptops and industrial POS machines.

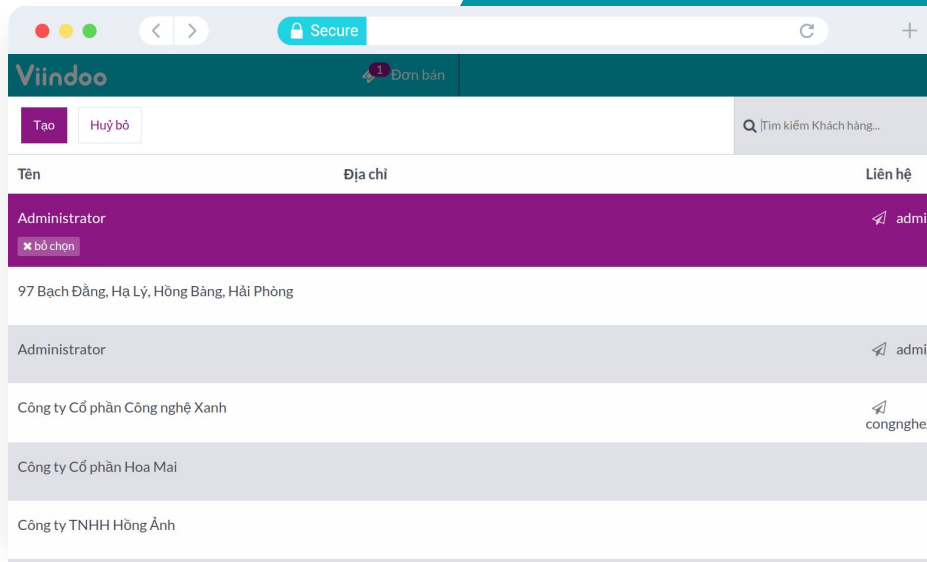

# Point of Sale (PoS)

Keep in touch with your customers

And keep them coming back with loyalty programs.

- Register your customers to keep track of their buying habits. You can then send them special offers and sale notices with Viindoo Mailing.
- Reward your loyal customers with points, gifts and discounts with Viindoo Loyalty Programs. The whole process is fast and can be entirely automated. Identifying your customers is even faster with loyalty cards and customer barcode ids.
- Register Tax Identifications for your Business Customers and give them invoices instantly (or send by email).

# Point of Sale (PoS)

## Integrated Inventory Management

- Consolidate all your sales channels in real time: stores, ecommerce, inside sales.
- Viindoo POS is fully integrated with other Viindoo apps. Your inventory app would automatically input any transaction from the POS in the stock.
- Furthermore, the POS is compatible with Viindoo Ecommerce solution. You won't need to setup separate stocks for the two apps and improve your process.
- Get real time control of the inventory and accurate forecasts to manage procurements.
- You will be able to see in real time the availability of products without losing time.

# Point of Sale (PoS)

Deliver in-store customer services: repairs, warranties, deliveries, etc.

Viindoo PoS is more than an ordinary PoS. Our app provides extra features to deliver awesome customer service.

Give your shopper a positive experience by improving your services.

Handle refunds, track warranties, follow customer claims, plan order deliveries, etc... in one interface.

Bring your sales at the next level, so that you follow your customers need and keep track of their needs.

Viindoo POS can produce customer invoices in just a few clicks and send information to Viindoo Accounting. You don't need to record manually each transaction and send them to your accountant. The software will automatically send them for any transaction. Your accounting will be easier and more accurate. Our Point of Sales helps you to control sales and cash in real time but also to keep accuracy for your store.

# Point of Sale (PoS)

Unified Data to improve your sales

---

With Viindoo as a backend, you have a system proven to be perfectly suitable for all sizes - from small stores to large multinational corporations.

Sync products, prices and customers with no effort
